Sonus Augments Network Layer Security and Optimizes Cloud Services Delivery with VellIOS Release 8.1

BARCELONA, Spain, Feb. 22, 2016 /PRNewswire/ --

Key Takeaways:

- | Sonus' VellIOS is an award-winning, application-aware network intelligence solution that allows customers to optimize and monetize their Cloud exchange network to supply on-demand Cloud services.
- | VellIOS Release 8.1 advances Sonus' topology discovery and application-aware path computation, enabling service provider revenue generation from per-flow SLAs.
- | This release also enhances network security by adapting packet forwarding rules based upon dynamic security policy decisions.

[Sonus Networks](#), Inc. (Nasdaq: SONS), [a global leader in secure and intelligent Cloud communications](#), introduced today VellIOS Release 8.1. Sonus' VellIOS is a programmable network control platform that permits service providers and enterprises to enhance, secure and monetize their Cloud exchange network. This release extends network layer security in support of a multi-layer security architecture, ensuring that organizations can dynamically implement security policies at the network layer. VellIOS enables this by delivering programmable segmentation of application traffic and business policy management tied directly to traffic forwarding rules.

VellIOS also provides dynamic path management - seamlessly handling changing network conditions. This functionality offers peace of mind to network administrators by meeting mission critical traffic SLAs and optimizing network resource utilization.

Quote:

"With CIOs constantly needing to respond to network threats, having a secure, dynamic network provides a competitive advantage to both service providers and enterprises," said Mykola Konrad, Sonus vice president, Product Management and Marketing. "VellIOS Release 8.1 increases the IT organization's ability to ensure mission critical application delivery, while simultaneously providing a way to secure those applications."

Other Facts:

- | VellIOS Release 8.1 will be generally available in March 2016.
- | VellIOS is designed to provide solutions for Network-as-a-Service; backup and disaster recovery; application optimization and network security.
- | VellIOS received a "2015 Cloud Computing Product of the Year" award from TMCnet and a 2016 INTERNET TELEPHONY "Product of the Year" award.
- | Visit Sonus during Mobile World Congress 2016 in Hall 6 Stand 6G11.
