Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1 — Conflict Minerals Disclosure

Item 1.01. Conflict Minerals Disclosure and Report

Sonus Networks, Inc. (the “Company,” “Sonus,” “we,” or “our”) has determined that some of the products that Sonus manufactures or contracts to manufacture include gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, tantalum, tin and tungsten (“Conflict Minerals” or “3TG”), and that these Conflict Minerals are necessary to the functionality or production of these products.

The Company conducted a Reasonable Country of Origin Inquiry (“RCOI”) to determine whether any of the Conflict Minerals in its products originated in the Democratic Republic of the Congo or an adjoining country (“Covered Country”) and whether the Conflict Minerals are from recycled or scrap sources. Based on our RCOI, the Company knows or has reason to believe that some of the Conflict Minerals in our products originated in the Covered Countries and are not from recycled or scrap sources. We therefore engaged in due diligence on the source and chain of custody of the Conflict Minerals in our products that originated or may have originated in the Covered Countries, as described in our Conflict Minerals Report filed herewith as Exhibit 1.01, and available on the Investor Relations — Corporate Governance section of the Company’s website at <http://investors.sonusnet.com/governance.cfm>.

Item 1.02. Exhibit

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934, Sonus is filing as an exhibit to this Form SD, the Conflict Minerals Report required by Item 1.01.

Section 2 — Exhibits

Item 2.01. Exhibits.

The following exhibit is filed as part of this Form SD:

Exhibit 1.01 Conflict Minerals Report for the year ended December 31, 2015, as required by Items 1.01 and 1.02 of this Form SD.

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Date: May 31, 2016

CONFLICT MINERALS REPORT

For the Year Ended December 31, 2015

Introduction

This report for the year ended December 31, 2015 has been prepared by Sonus Networks, Inc. (the “Company”, “Sonus”, “we,” “us,” or “our”) to comply with Rule 13p-1 (the “Rule”) under the Securities Exchange Act of 1934, as amended. The Rule imposes certain disclosure and reporting obligations on companies that report with the SEC and which manufacture, or contract to have manufactured, products containing conflict minerals that are necessary to the functionality or production of those products. Conflict Minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten, and gold (collectively, “3TG” or “Conflict Minerals”).

Company Overview

Sonus brings intelligence and security to real-time communications. By helping the world embrace the next generation of cloud-based Session Initiation Protocol (“SIP”) and 4G/LTE (“Long Term Evolution”)-based solutions, Sonus enables and secures latency-sensitive, mission critical traffic for Voice over Internet Protocol (“VoIP”), video, instant messaging and online collaboration. With Sonus, enterprises can give priority to real-time communications based on smart business rules while service providers can offer high-performance, reliable and secure on-demand network services to their customers. With comprehensive solutions deployed in more than 100 countries and nearly two decades of experience, Sonus offers a complete portfolio of virtualized and appliance-based session border controllers (“SBCs”), diameter signaling controllers (“DSCs”), policy/routing servers, network intelligence applications, media and signaling gateways and network analytics tools.

Conflict Minerals Policy

Sonus has adopted a Conflict Minerals Policy and communicated such policy to its suppliers. This policy is available at the Investor Relations-Corporate Governance section of the Company’s website at <http://investors.sonusnet.com/governance.cfm>.

Products Overview

This report covers the following Sonus products that were manufactured in 2015 (the “2015 Sonus Products”): SBCs, DSCs, Voice over IP (VoIP) trunking solutions, policy/routing servers, media and signaling gateways, including the GSX 9000 High-Density Media Gateway, and network analytics tools.

Supply Chain and Reasonable Country of Origin Inquiry

Sonus has determined that 3TG are necessary to the functionality or production of products manufactured or contracted to be manufactured by the Company. We utilize an outsourced supply chain model pursuant to which our contract manufacturers procure materials on our behalf. Our supply chain is multi-tiered, global and complex, and we outsource the manufacturing of our hardware products such that we are many steps removed from the mining and smelting or refining of Conflict Minerals. Therefore, we rely upon our suppliers to provide information on the origin, source and chain of custody of the Conflict Minerals contained in product components and materials. Some of these suppliers may themselves purchase from lower tier suppliers and not directly from a miner, smelter or refiner.

The Company conducted a Reasonable Country of Origin Inquiry (“RCOI”) to determine whether any of the Conflict Minerals in our 2015 Sonus Products originated in the Democratic Republic of the Congo (“DRC”) or an adjoining country (collectively, the “Covered Countries”) and whether the Conflict Minerals are from recycled or scrap sources. Based on our RCOI, we know or have reason to believe that some of the Conflict Minerals in our 2015 Sonus Products originated in the Covered Countries and are not from recycled or scrap sources.

Sonus’ RCOI measures included conducting a supply-chain survey with in-scope suppliers using the template developed by the Electronic Industry Citizenship Coalition (“EICC”) and The Global e-Sustainability Initiative (“GeSI”), known as the Conflict-Free Sourcing Initiative (“CFSI”) Reporting Template (the “Template”). The Template was developed to facilitate disclosure and communication of information regarding smelters that provide material to a company’s supply chain. It included questions regarding the supplier’s conflict-free policy, engagement with its direct suppliers, and a listing of the smelters the company and its suppliers use. In addition, the Template contained questions about the origin of Conflict Minerals included in their products, as well as supplier due diligence. In scope suppliers were determined by excluding the following: (1) suppliers that provided materials outside the supply chain as of January 1, 2015; and (2) suppliers that provided products for which Sonus had no influence over the design, materials, parts, ingredients or components included in that product. The Template was designed to provide Sonus with sufficient information regarding its suppliers’ practices with respect to the sourcing of Conflict Minerals to enable it to comply with its obligations under the Rule.

Due Diligence Process

In accordance with the Rule, Sonus undertook due diligence on the source and chain of custody of the Conflict Minerals in the 2015 Sonus Products that originated or may have originated in the Covered Countries. The Company’s due diligence measures were designed to conform, in all material respects, to the internationally recognized due diligence framework in The Organization for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (“OECD Guidance”) and the related supplements.

Due Diligence Measures

Sonus performed the following due diligence measures in accordance with the OECD Guidance and the Rule:

OECD Guidance Step 1: Establish Strong Company Management Systems

- Sonus' Conflict Minerals compliance efforts are overseen by the Company's Vice President, Manufacturing, Operations and Supply Chain and its manufacturing department, and supported and sponsored by the Company's engineering, audit and legal departments. Sonus employees who are responsible for Conflict Minerals compliance have received training regarding Conflict Minerals compliance. The team was structured to ensure critical information, including our policies related to this subject matter, reached relevant employees and suppliers. To the extent red flags or other issues are identified in the supplier data acquisition or engagement processes, these issues and red flags will be addressed first by the responsible individuals within the engineering, audit and legal departments, and, if deemed necessary, will then be reported to and reviewed by the Audit Committee of the Board of Directors at regularly scheduled meetings on an annual basis.
- Sonus also engaged SiliconExpert Technologies, a provider of electronic component data and BOM Management software to the electronics industry ("SiliconExpert"), to assist with its Conflict Minerals compliance efforts. Frequent status meetings are held between Sonus' Conflict Minerals support team and SiliconExpert, with Sonus management receiving status updates on progress and due diligence efforts on a regular and timely basis.
- In addition, Sonus has a Conflict Minerals Policy and communicates such policy to its suppliers, which is available on our Investor Relations — Corporate Governance section of our website at <http://investors.sonusnet.com/governance.cfm>.

2

- Pursuant to the Conflict Minerals Policy, to the extent any employee, officer or director has concerns or grievances about the Company's potential use of Conflict Minerals, such individual is urged to contact his or her manager, the Company's Chief Financial Officer, the General Counsel or other member of senior management, the Employee Hotline (which can be used on an anonymous basis) or the Audit Committee.
- Sonus established documentation and record maintenance mechanisms to ensure the retention of information relevant to the Company's Conflict Minerals Policy electronically.

OECD Guidance Step 2: Identify and Assess Risk in the Supply Chain

- Sonus reviewed the information reported on the Template by its suppliers and followed up with any additional questions. To the extent an in-scope supplier had follow-up questions, Sonus was diligent and provided all requested information, including Sonus part numbers and manufacturing lots to identify how the supplies were used in Sonus' products.
- Untimely or incomplete responses as well as inconsistencies within the data reported by suppliers were addressed directly with respective suppliers to provide the required and/or revised responses. Sonus utilizes a series of escalating responses to address the failure of a supplier to provide the information required by the Template.
- Sonus' engineering, audit and legal departments manage the collection of information reported on the Template by its suppliers.
- Sonus collected a list of smelters/processors that are in our supply chain using the Template and reconciled this list to the list of smelter facilities designated by the CFSI's Conflict-Free Smelter Program. Sonus has provided that list in this report.
- Sonus, through SiliconExpert, followed up with suppliers that did not respond initially to our requests to complete the Template.

OECD Guidance Step 3: Design and Implement a Strategy to Response to Identified Risks

- Sonus adopted and used the Template to monitor and mitigate supply chain risk and took the steps described above.
- Sonus worked with certain suppliers to better educate them on the Conflict Minerals process.
- Members of the Conflict Minerals team periodically report to senior management as well as the Audit Committee of the Board of Directors on program developments and progress.

OECD Guidance Step 4: Carry Out Independent Third-Party Audit of Supply Chain Due Diligence

- Given that we do not generally have a direct relationship with the smelters and refineries that process the Conflict Minerals that are present in our products, we rely on the CFSI to conduct audits of and validate the conflict-free status of smelters and refineries that source from Covered Countries. We have not relied on supplier representations concerning the conflict status of their smelters, but have required industry certification such as through the CFSI Conflict-Free Smelter Program before concluding that a smelter or refinery is conflict free. We understand that this program is continuing to audit smelters and refineries to add to its Conflict-Free Smelter List.

OECD Guidance Step 5: Report on Supply Chain Due Diligence

- As required by the Rule, we have filed a Form SD and a Conflict Minerals Report as an exhibit thereto for the 2015 calendar year reporting period. In accordance with OECD Guidance and the

3

Due Diligence Results

Sonus contacted 100% of in-scope suppliers for the 2015 Sonus Products and received some degree of a response for approximately 94% of the supplier population surveyed. Of that 94%, approximately 90% of the suppliers provided completed responses to the survey. The large majority of the completed responses received provided conflict mineral data and a declaration at a “Company Level” (supplier/company declaration represents all the supplier’s products) or “Divisional Level” (supplier/company declaration represents all the supplier’s products from a division of the company). As a result, we are unable to determine whether any of the Conflict Minerals reported by the suppliers were contained in specific components or parts supplied to us.

Further, while our suppliers identified certain of the smelters and refineries that provided Conflict Minerals, the responses did not provide specific information regarding the smelters or refineries of the Conflict Minerals in the particular components used in the 2015 Sonus Products. On account of this lack of information, Sonus is unable to determine with specificity the facilities used to process those necessary Conflict Minerals or their country of origin for the 2015 Sonus Products. Based on the responses we received from our suppliers, however, we believe the facilities used to produce the Conflict Minerals in the 2015 Sonus Products may include the smelters and refineries listed in Annex A. In addition, based on the supplier responses, we believe the countries of origin of the Conflict Minerals in the 2015 Sonus Products may include those listed in Annex B.

Risk Mitigation Steps to be taken for 2016 Due Diligence

Sonus intends to take the following steps during the next compliance period to further improve our due diligence process and results and to further mitigate the risk that our necessary Conflict Minerals benefit armed groups in the DRC or adjoining countries:

- Seek additional ways to improve quality and quantity of supplier response rates;
- Continue to work with suppliers and better educate them on the process;
- Continue to compare survey results to information collected via independent conflict free smelter validation programs such as the EICC/GeSI Conflict Free Smelter program;
- Seek to implement standard procedures for corrective action or phasing out of suppliers not found to be DRC conflict free;
- Continue to adhere to the OECD Guidance; and
- Seek to work with suppliers who use appropriate due diligence methods and have continuous monitoring of both the direct and indirect supply chain to avoid procurement or use of Conflict Minerals.

Audit

An independent private sector audit was not required for reporting year 2015.

Important Information Regarding Forward-Looking Statements

The information in this report contains “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, which are subject to a number of risks and uncertainties. All statements other than statements of historical facts contained in this report, including statements in the section “Risk Mitigation Steps to be taken for 2016 Due Diligence,” are forward-looking statements. Without limiting the foregoing, the words “anticipates”, “believes”, “could”, “estimates”, “expects”, “expectations”, “intends”, “may”, “plans”, “seeks”, “projects” and other similar language, whether in the negative or affirmative, are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words.

Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict.

Sonus therefore cautions readers against undue reliance on any of these forward-looking statements. Any forward-looking statement made by Sonus in this report speaks only as of the date of this report. Sonus undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

Documents Incorporated by Reference

Unless otherwise stated herein, any documents, third party materials or references to websites (including Sonus’) are not incorporated by reference in, or considered to be a part of, this report unless expressly incorporated by reference herein.

Annex A

We present in this report a list of smelters or refineries provided by those suppliers who completed the smelter list on our Template, to the extent reasonably determinable, and that may have provided Conflict Minerals in any of the 2015 Sonus Products. The table below includes only facilities, to the extent known, that have been validated by the CFSI as facilities that are certified Conflict-Free or are listed on the Template as “known smelters or refineries”. Smelters and refineries that are denoted with an asterisk (*) in the table below have received a “conflict free” designation from an independent third party audit program.

Annex B

Countries of origin of the Conflict Minerals facilities listed in Annex A are believed to include:

Countries of Origin

Argentina
Australia
Austria
Belarus
Belgium
Bolivia
Brazil
Burundi
Canada
Central African Republic
Chile
China
Colombia
Congo, DRC
Cote d'Ivoire
Estonia
Ethiopia
Germany
Guyana
Hong Kong
India
Indonesia
Italy
Japan
Kazakhstan
Laos
Malaysia
Mexico
Mozambique
Namibia
Nigeria
Papua New Guinea
Peru
Philippines

45

Countries of Origin

Poland
Portugal
Russia
Rwanda
Sierra Leone
Singapore
South Africa
South Korea
Spain
Suriname
Switzerland
Taiwan
Thailand
United Kingdom
United States
Uzbekistan
Vietnam
Zimbabwe
