

Company Profile for Sonus Networks

Sonus Networks is a leading provider of voice and data infrastructure solutions, including softswitch and session border control products for service providers and large enterprises. Our infrastructure solutions allow efficient and reliable delivery of voice and multimedia sessions over IP networks while allowing our customers to manage session flows in their networks using business policies. Sonus solutions help customers to gracefully migrate their networks from TDM (circuit switched) networks to all-IP networks. Sonus has helped some of the world's largest wireline and wireless service providers in over 50 countries to create and deliver value with their deployed networks. Enterprises leverage Sonus' technology to create secure, reliable, scalable and cost-effective voice networks.
