UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 27, 2014

o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission File Number 001-34115

SONUS NETWORKS, INC.

(Exact name of Registrant as specified in its charter)

DELAWARE

(State or other jurisdiction of incorporation or organization)

04-3387074

(I.R.S. Employer Identification No.)

4 Technology Park Drive, Westford, Massachusetts 01886

(Address of principal executive offices) (Zip code)

(978) 614-8100

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o

Accelerated filer x

Non-accelerated filer o
(Do not check if a smaller reporting company)

Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No x

As of July 24, 2014, there were 246,795,393 shares of the registrant's common stock, \$0.001 par value, outstanding.

Cautionary Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, which are subject to a number of risks and uncertainties. All statements other than statements of historical facts contained in this Quarterly Report on Form 10-Q, including statements regarding our future results of operations and financial position, business strategy, plans and objectives of management for future operations and plans for future product development and manufacturing are forward-looking statements. Without limiting the foregoing, the words "anticipates", "believes", "could", "estimates", "expects", "intends", "may", "plans", "seeks" and other similar language, whether in the negative or affirmative, are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. We therefore caution you against relying on any of these forward-looking statements.

Important factors that could cause actual results to differ materially from those in these forward-looking statements are discussed in Part I, Items 2 and 3, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Quantitative and Qualitative Disclosures About Market Risk," respectively, and Part II, Item 1A, "Risk Factors," of this Quarterly Report on Form 10-Q. Also, any forward-looking statement made by us in this Quarterly Report on Form 10-Q was first filed. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise.

SONUS NETWORKS, INC. Notes to Condensed Consolidated Financial Statements (unaudited)

(1) BASIS OF PRESENTATION

Business

Sonus Networks, Inc. ("Sonus" or the "Company") was incorporated in 1997 and is a leading provider of networked solutions for communications service providers (e.g., telecommunications, wireless and cable service providers) and enterprises to help them advance, protect and unify their voice and data communication networks, reduce expenses and position themselves to provide new services to their customers. Sonus helps many of the world's leading communications service providers and enterprises implement the next generation of Session Initiation Protocol ("SIP")-based solutions, including Voice over IP ("VoIP") and Unified Communications ("UC") through secure, reliable and scalable Internet Protocol ("IP") networks. We also provide tightly integrated signaling and advanced routing capabilities and applications that span the mission-critical demands of both existing and next-generation 4G/LTE and IP Multimedia Subsystems ("IMS") telecommunications networks. Sonus products include session border controllers ("SBCs"), diameter signaling controllers ("DSCs"), policy/routing servers, media and signaling gateways and network analytics tools. Sonus solutions address the need for communications service providers and enterprises to seamlessly link and leverage multivendor, multiprotocol communications systems and applications across a single network infrastructure. Previously, companies were required to implement separate networks for their voice and data applications. In a rapidly changing ecosystem of IP-enabled devices such as smartphones and tablets, companies want an infrastructure that enables the integration of voice and data capability into a single application on one integrated network. Sonus solutions help the Company's customers realize the intended value and benefits of UC both in public and private clouds by enabling disparate vendor communications environments, commonplace in most enterprises today, to work seamlessly together. Likewise, Sonus solutions facilitate the deployment and adoption of cloud-based c

The Company utilizes both direct and indirect sales channels to reach its target customers. Customers and prospective customers in the service provider space are traditional and emerging communications service providers, including long distance carriers, local exchange carriers, Internet service providers, wireless operators, cable operators, international telephone companies and carriers that provide services to other carriers. Enterprise customers and target enterprise customers include financial institutions, retailers, state and local governments, and other multinational corporations. The Company collaborates with its customers to identify and develop new, advanced services and applications that can help to reduce costs, improve productivity and generate new revenue.

Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements include all adjustments, consisting only of normal recurring items, necessary for their fair presentation with accounting principles generally accepted in the United States of America ("GAAP") and with the rules and regulations of the U.S. Securities and Exchange Commission ("SEC").

Interim results are not necessarily indicative of results for a full year or any future interim period. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2013 ("Annual Report") filed with the SEC effective February 28, 2014.

On February 19, 2014 (the "PT Acquisition Date"), the Company completed the acquisition of Performance Technologies, Incorporated ("PT"). The financial results of PT are included in the Company's condensed consolidated financial statements for the three months ended June 27, 2014 and in the Company's condensed consolidated financial statements for the six months ended June 27, 2014 for the period subsequent to the PT Acquisition Date.

Significant Accounting Policies

The Company's significant accounting policies are disclosed in Note 2 to the Consolidated Financial Statements included in the Annual Report. There were no material changes to the significant accounting policies during the three or six months ended June 27, 2014.

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

Principles of Consolidation

The condensed consolidated financial statements include the accounts of Sonus and its wholly-owned subsidiaries. Intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates and Judgments

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates and judgments relied upon in preparing these consolidated financial statements include accounting for business combinations, revenue recognition for multiple element arrangements, inventory valuations, assumptions used to determine the fair value of stock-based compensation, intangible assets and goodwill valuations, including impairments, legal contingencies and recoverability of Sonus' net deferred tax assets and the related valuation allowances. Sonus regularly assesses these estimates and records changes in estimates in the period in which they become known. Sonus bases its estimates on historical experience and various other assumptions that it believes to be reasonable under the circumstances. Actual results could differ from those estimates.

Fair Value of Financial Instruments

The carrying amounts of the Company's financial instruments, which include cash equivalents, marketable securities, investments, accounts receivable, accounts payable, convertible subordinated debt and other long-term liabilities, approximate their fair values.

Operating Segments

The Company operates in a single segment. Operating segments are identified as components of an enterprise about which separate discrete financial information is available for evaluation by the chief operating decision maker in making decisions regarding resource allocation and assessing performance. To date, the chief operating decision maker has made such decisions and assessed performance at the company level, as one segment. The Company's chief operating decision maker is its President and Chief Executive Officer.

Recent Accounting Pronouncements

On June 19, 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-12, *Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period (a consensus of the FASB Emerging Issues Task Force)* ("ASU 2014-12"). ASU 2014-12 clarifies that entities should treat performance targets that can be met after the requisite service period of a share-based payment award as performance conditions that affect vesting. Therefore, an entity would not record compensation expense (measured as of the grant date without taking into account the effect of the performance target) related to an award for which transfer to the employee is contingent upon the entity's satisfaction of a performance target until it becomes probable that the performance target will be met. ASU 2014-12 does not contain any new disclosure requirements. ASU 2014-12 is effective for the Company on January 1, 2015. The Company does not expect the adoption of ASU 2014-12 to have a material impact on its condensed consolidated financial statements.

On May 28, 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09") its final standard on revenue from contracts with customers. ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the revenue model to contracts within its scope, an entity identifies the contract(s) with a customer, identifies the performance obligations in the contract, determines the transaction price, allocates the transaction price to the performance obligations in the contract and recognizes revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 applies to all contracts with customers that are within the scope of

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

other topics in the FASB Accounting Standards Codification ("ASC"). Certain of ASU 2014-09's provisions also apply to transfers of nonfinancial assets, including in-substance nonfinancial assets that are not an output of an entity's ordinary activities (i.e., property plant and equipment; real estate; or intangible assets). Existing accounting guidance applicable to these transfers has been amended or superseded. ASU 2014-09 also requires significantly expanded disclosures about revenue recognition. ASU 2014-09 is effective for the Company on January 1, 2017. The Company is currently assessing the potential impact of the adoption of ASU 2014-09 on its condensed consolidated financial statements.

On April 10, 2014, the FASB issued ASU 2014-08, *Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity* ("ASU 2014-08"), which amends the definition of discontinued operations in ASC 205-20 and requires entities to provide additional disclosures about discontinued operations as well as disposal transactions that do not meet the discontinued operations criteria. The new guidance eliminates the previous criteria that the operations and cash flows of the component that have been (or will be) eliminated from the ongoing operations of the entity as a result of the disposal transaction. The new guidance also eliminates the previous criteria that the entity will not have any significant continuing involvement in the operations of the component after the disposal transaction. Instead, ASU 2014-08 requires discontinued operations treatment for disposals of a component or group of components that represents a strategic shift that has or will have a major impact on an entity's operations or financial results. ASU 2014-08 requires entities to reclassify assets and liabilities of a discontinued operation for all comparative periods presented in the statement of financial position. In addition, ASU 2014-08 requires that an entity disclose in its statement of cash flows, for all periods presented, either: (1) operating and investing cash flows or (2) depreciation and amortization, capital expenditures and significant operating and investing non-cash items related to the discontinued operation. ASU 2014-08 is effective prospectively for all disposals (except disposals classified as held for sale before the adoption date) or components initially classified as held for sale in periods beginning on or after December 15, 2014. The Company does not expect the adoption of ASU 2014-08 to have a material impact on its condensed consolidated financial statements.

On July 18, 2013, the FASB issued ASU 2013-11, *Presentation of a Liability for an Unrecognized Tax Benefit When a Net Operating Loss Carryforward or Tax Credit Carryforward Exists* ("ASU 2013-11"), which provides guidance on financial statement presentation of an unrecognized tax benefit when a net operating loss ("NOL") carryforward, a similar tax loss or a tax credit carryforward exists. The FASB's objective in issuing ASU 2013-11 was to eliminate diversity in practice resulting from a lack of guidance on this topic in current GAAP. ASU 2013-11 requires that an entity present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, in the financial statements as a reduction to a deferred tax asset for an NOL carryforward, a similar tax loss or a tax credit unless certain conditions exist. ASU 2013-11 was effective for the Company beginning January 1, 2014. The adoption of ASU 2013-11 did not have an impact on the Company's condensed consolidated financial statements, as the Company already applied the methodology prescribed by ASU 2013-11.

On March 4, 2013, the FASB issued ASU 2013-05, *Foreign Currency Matters (Topic 830) - Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity ("ASU 2013-05")*, which indicates that the entire amount of a cumulative translation adjustment ("CTA") related to an entity's investment in a foreign entity should be released when there has been either: (a) a sale of a subsidiary or group of net assets within a foreign entity and the sale represents the substantially complete liquidation of the investment in a foreign entity; (b) the loss of a controlling financial interest in an investment in a foreign entity (i.e., the foreign entity is deconsolidated); or (c) the step acquisition of a foreign entity (i.e., when the accounting for an entity has changed from applying the equity method for an investment in a foreign entity to consolidating the foreign entity). ASU 2013-05 does not change the requirement to release a pro rata portion of the CTA of the foreign entity into earnings for a partial sale of an equity method investment in a foreign entity. ASU 2013-05 was effective for the Company beginning January 1, 2014. The adoption of ASU 2013-05 did not have a material impact on the Company's condensed consolidated financial statements.

(2) ACQUISITION OF PT

On February 19, 2014 (the "PT Acquisition Date"), the Company acquired all of the outstanding common stock of PT for cash consideration of \$34.0 million, or \$3.75 per share of PT common stock. This acquisition has enabled Sonus to expand its solutions portfolio with signaling technology and acquire expertise to enable mobile service providers to offer new real-time multimedia services through their mobile infrastructure. Delivering these services across the LTE next-generation mobile

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

networks will require adoption of the next-generation signaling technology known in the industry as Diameter Signal. The acquisition of PT has allowed Sonus to diversify its product portfolio with an integrated, virtualized Diameter and SIP-based solution and deliver strategic value to service providers seeking to offer new multimedia services through mobile, cloud-based, real-time communications.

The transaction has been accounted for as a business combination and the financial results of PT have been included in the Company's condensed consolidated financial statements for the period subsequent to its acquisition.

As of June 27, 2014, the valuation of acquired assets, identifiable intangible assets, uncertain tax liabilities and certain accrued liabilities remains preliminary. The Company is in the process of finalizing its valuation, which it plans to complete in the third quarter of fiscal 2014. Based on new information gathered about facts and circumstances that existed as of the PT Acquisition Date related to the valuation of certain acquired assets and assumed liabilities, the Company updated its preliminary valuations of assets acquired and liabilities assumed as of June 27, 2014. The Company recorded adjustments which resulted in an increase to goodwill of \$0.5 million, a decrease to other current assets of \$0.3 million and an increase to other long-term liabilities of \$0.2 million. Based on the updated purchase price allocation, the Company recorded \$8.7 million of goodwill, primarily due to expected synergies between the combined companies and expanded market opportunities. The goodwill is not deductible for tax purposes.

A summary of the allocation of the purchase consideration for PT is as follows (in thousands):

Fair value of consideration transferred:	
Cash, net of cash acquired	\$ 34,010
Unpaid purchase consideration	1,012
Fair value of equity awards assumed	1,671
Fair value of total consideration	\$ 36,693
Fair value of assets acquired and liabilities assumed:	
Marketable securities	\$ 2,315
Other current assets	9,393

Intangible assets	17,100
Goodwill	8,725
Current liabilities	(2,762)
Other long-term liabilities	(329)
	\$ 36,693

The valuation of the acquired intangible assets is inherently subjective and relies on significant unobservable inputs. The Company used an income approach to preliminarily value the acquired customer relationships and developed technology intangible assets. The valuation for each of these intangible assets was based on estimated projections of expected cash flows to be generated by the assets, discounted to the present value at discount rates commensurate with perceived risk. The valuation assumptions take into consideration the Company's estimates of contract renewal, technology attrition and revenue growth projections. The Company is amortizing the identifiable intangible assets in relation to the expected cash flows from the individual intangible assets over their respective useful lives (see Note 6).

The Company has not provided pro forma information as the results of PT are not material to the Company's financial results.

Acquisition-Related Expenses

Acquisition-related expenses include those expenses related to the acquisition that would otherwise not have been incurred by the Company. These expenses include professional and services fees, such as legal, audit, consulting, paying agent and other fees, and expenses related to cash payments to certain former PT executives under their respective PT change of control agreements.

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

The components of acquisition-related costs included in the Company's results of operations for the six months ended June 27, 2014 are as follows (in thousands):

	Six	x months ended
		June 27, 2014
Professional and services fees	\$	1,057
Change of control agreements		249
	\$	1,306

The Company did not record any acquisition-related expenses in either the three months ended June 27, 2014 or the three or six months ended June 28, 2013.

Sale of Multi-Protocol Server Business

On June 20, 2014 (the "MPS Sale Date"), the Company sold its PT Multi-Protocol Server ("MPS") business for \$2.0 million to an affiliate of Sunhillo Corporation, comprised of \$0.2 million of inventory, \$0.1 million of fixed assets, \$0.2 million of deferred revenue and \$1.9 million of PT goodwill allocable to the MPS business. The Company had acquired the MPS business in connection with the acquisition of PT. The Company incurred \$0.4 million of transaction costs which are included as a component of General and administrative expenses. The results of operations of the MPS business are excluded from the Company's consolidated results for the period subsequent to the MPS Sale Date.

(3) EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of shares outstanding during the period. For periods in which the Company reports net income, diluted net income per share is determined by using the weighted average number of common and dilutive common equivalent shares outstanding during the period unless the effect is antidilutive.

The calculations of shares used to compute basic and diluted loss per share are as follows (in thousands):

	Three mor	nths ended	Six mont	hs ended	
	June 27, 2014	June 28, 2013	June 27, 2014	June 28, 2013	
Weighted average shares outstanding—basic	247,120	282,389	257,026	281,973	
Potential dilutive common shares	_	_	_	_	
Weighted average shares outstanding—diluted	247,120	282,389	257,026	281,973	

Options to purchase the Company's common stock, unvested shares of restricted stock, unvested performance-based stock awards for which the performance conditions have been satisfied and shares in connection with future purchases under the Company's Amended and Restated 2000 Employee Stock Purchase Plan, as amended (the "ESPP"), aggregating 44.1 million shares for the three and six months ended June 27, 2014 have not been included in the computation of diluted loss per share because their effect would have been antidilutive. Options to purchase the Company's common stock and unvested shares of restricted stock aggregating 36.0 million shares for the three and six months ended June 28, 2013 have not been included in the computation of diluted loss per share because their effect would have been antidilutive.

(4) CASH EQUIVALENTS, MARKETABLE SECURITIES AND INVESTMENTS

The Company invests in debt instruments, primarily U.S. government-backed, municipal and corporate obligations, which management believes to be high quality (investment grade) credit instruments.

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

During the three months ended March 28, 2014, the Company sold \$45.9 million of its available-for-sale securities and realized gross gains aggregating \$46,000. The Company did not realize any gross losses on these sales. In addition, \$41.7 million of the Company's available-for-sale securities matured during the three months ended March 28, 2014 and were redeemed upon maturity. The Company did not sell any of its available-for-sale securities during the three months ended June 27, 2014 or during the three or six months ended June 28, 2013, and accordingly, no such gains or losses were realized during such period.

Marketable securities and investments with continuous unrealized losses for one year or greater at June 27, 2014 were nominal. Since the Company currently does not intend to sell these securities and does not believe it will be required to sell any securities before they recover in value, it does not believe these declines are other-than-temporary.

On a quarterly basis, the Company reviews its marketable securities and investments to determine if there have been any events that could create a credit impairment. The increase in unrealized losses in the current year period primarily relates to the recent increase in interest rates. However, since the Company's entire investment portfolio has investment grade ratings with no indication of credit loss, the Company believes it will recover the entire amortized cost basis of these securities and does not believe these unrealized losses are other-than-temporary. Accordingly, the Company does not believe that any impairment existed with its current holdings at June 27, 2014.

The amortized cost, gross unrealized gains and losses and fair value of the Company's marketable debt securities and investments at June 27, 2014 and December 31, 2013 were comprised of the following (in thousands):

		June 27, 2014

The Company's available-for-sale debt securities classified as Investments in the condensed consolidated balance sheets at June 27, 2014 and December 31, 2013 had maturity dates after one year but within two years or less from the balance sheet date.

Fair Value Hierarchy

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. The three-tier fair value hierarchy is based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The fair value hierarchy is as follows:

Level 1. Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2. Level 2 applies to assets or liabilities for which there are inputs that are directly or indirectly observable in the marketplace, such as quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets).

Level 3. Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The following table shows the fair value of the Company's financial assets at June 27, 2014 and December 31, 2013. These financial assets are comprised of the Company's available-for-sale debt securities and reported under the captions Cash and cash equivalents, Marketable securities and Investments in the consolidated balance sheets (in thousands):

The Company's marketable securities and investments have been valued on the basis of valuations provided by third-party pricing services, as derived from such services' pricing models. Inputs to the models may include, but are not limited to, reported trades, executable bid and asked prices, broker/dealer quotations, prices or yields of securities with similar characteristics, benchmark curves or information pertaining to the issuer, as well as industry and economic events. The pricing services may use a matrix approach, which considers information regarding securities with similar characteristics to determine the valuation for a security. The Company is ultimately responsible for the condensed consolidated financial statements and underlying estimates. Accordingly, the Company assesses the reasonableness of the valuations provided by the third-party pricing services by reviewing actual trade data, broker/dealer quotes and other similar data, which are obtained from quoted market prices or other sources.

2017	5,257
2018	2,954
Thereafter	3,446
	\$ 24,984

The changes in the carrying value of the Company's goodwill in the six months ended June 27, 2014 were as follows (in thousands):

Balance at January 1, 2014:

Goodwill	\$ 35,485
Accumulated impairment losses	(3,106)
	32,379
Acquisition of PT	8,725
Sale of MPS business	(1,897)
Balance at June 27, 2014	\$ 39,207

There were no changes to the carrying value of the Company's goodwill in the six months ended June 28, 2013.

(7) ACCRUED EXPENSES

Accrued expenses consist of the following (in thousands):

	 June 27, 2014	De	cember 31, 2013
Employee compensation and related costs	\$ 15,711	\$	20,683
Other	13,146		13,343
	\$ 28,857	\$	34,026

(8) RESTRUCTURING ACCRUAL

The Company recorded restructuring expense of \$0.4 million in the three months ended June 27, 2014 and \$1.6 million in the six months ended June 27, 2014 for severance and related costs in connection with reducing its workforce. The Company recorded restructuring expense of \$1.7 million in the three months ended June 28, 2013 and \$3.6 million in the six months ended June 28, 2013. The amount for the three months ended June 28, 2013 is comprised of \$1.4 million for severance and related costs and \$0.3 million for facility costs. The amount for the six months ended June 28, 2013 is comprised of \$3.3 million for severance and related costs and \$0.3 million for facility costs.

The table below summarizes the restructuring accrual activity for the six months ended June 27, 2014 (in thousands):

	Balance at Initiatives January 1, charged to 2014 expense I				Cash payments	Balance at June 27, 2014
Severance	\$ 1,333	\$	1,560	\$	(2,068)	\$ 825
Facilities	3,012		_		(590)	2,422
	\$ 4,345	\$	1,560	\$	(2,658)	\$ 3,247

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

The Company expects to complete the restructuring payments related to severance in the first quarter of fiscal 2015 and the payments related to facilities in fiscal 2016. The portion of restructuring payments due more than one year from the balance sheet date is included in Other long-term liabilities in the Company's condensed consolidated balance sheets. The long-term portions of accrued restructuring were \$1.4 million at June 27, 2014 and \$1.8 million at December 31, 2013.

(9) **DEBT**

Credit Agreement

On June 27, 2014, the Company entered into a credit agreement (the "Credit Agreement") by and among the Company, as Borrower, Bank of America, N.A. ("Bank of America"), as Administrative Agent, Swing Line Lender and L/C Issuer, and the other lenders from time to time party thereto. The Credit Agreement provides for a revolving credit facility of up to \$40 million and provides that the Company may select the interest rates under the credit facility equal to (1) the Eurodollar Rate (which is defined as the rate per annum equal to the London Interbank Offered Rate plus 1.5% per annum) for a Eurodollar Rate Loan; and (2) the highest of (a) the Federal Funds Rate plus 1/2 of 1%, (b) the rate of interest in effect on the borrowing date as publicly announced from time to time by Bank of America as its prime rate, and (c) the monthly Eurodollar Rate plus 1%. The Company will pay a 0.15% commitment fee on the unused commitments available for borrowing.

Borrowings under the Credit Agreement may be used for the general corporate purposes of the Company and its subsidiaries, including, without limitation, working capital, acquisitions, dividends and stock repurchases, to the extent permitted under the Credit Agreement.

The obligations of the Company under the Credit Agreement are guaranteed by Sonus International, Inc., Sonus Federal, Inc., Network Equipment Technologies, Inc. ("NET") and PT (collectively, together with the Company, the "Loan Parties") pursuant to a Master Continuing Guaranty and are secured by the assets of the Loan Parties pursuant to a Security and Pledge Agreement.

The Credit Agreement contains affirmative, negative and financial covenants customary for financings of this type. The negative covenants include limitations on liens, indebtedness, fundamental changes, dispositions, restricted payments, investments, transactions with affiliates, certain restrictive agreements and compliance with sanctions laws and regulations. The amount of cash and cash equivalents of the Loan Parties, subject to certain exclusions, cannot be less than an aggregate amount of \$100 million at any time. The credit facility will become due on June 27, 2015, subject to acceleration upon certain specified events of default, including, without limitation, payment defaults, defaults in the performance of affirmative and negative covenants, the inaccuracy of representations or warranties, bankruptcy and insolvency-related defaults, defaults relating to judgments, an ERISA Event (as defined in the Credit Agreement), the failure to pay specified indebtedness and a change of control default.

The Company did not have any amounts outstanding under the Credit Agreement at June 27, 2014.

Assumed Debt - Acquisition

The Company has determined that the estimated fair value of its \$2.4 million of aggregate principal amount of outstanding debt assumed in connection with the August 2012 acquisition of NET and due in December 2014 equaled its carrying value at both June 27, 2014 and December 31, 2013. Although the debt can be publicly traded, there have been no trading transactions since 2010 and accordingly, the Company has categorized it in Level 2 within the fair value hierarchy.

(10) STOCKHOLDER RIGHTS PLAN

On June 21, 2013, the Company entered into an amendment to its stockholder rights agreement, as amended (the "Rights Plan"), to extend the expiration date of the rights in such Rights Plan from June 26, 2013 to June 26, 2015. The amendment

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

was not in response to any acquisition proposal and no other amendments were made to the Rights Plan. The Rights Plan was originally adopted on June 26, 2008 and subsequently extended to June 26, 2013 on June 10, 2011.

Under the Rights Plan, preferred stock purchase rights (the "Rights") were distributed as a dividend at the rate of one Right per share of common stock held by stockholders of record as of the close of business on July 7, 2008. Each Right entitles the stockholder to purchase from the Company a unit consisting of one one-thousandth of a share (a "Unit") of preferred stock at a purchase price of \$25.00, subject to adjustment.

The Rights generally will be exercisable only if a person or group acquires beneficial ownership of 15% or more of the Company's common stock (which includes for this purpose shares of common stock referenced in derivative transactions or securities), or commences or publicly announces a tender or exchange offer upon consummation of which they would beneficially own 15% or more of the Company's common stock. Subject to certain conditions, a person or group who beneficially owned 15% or more of the outstanding shares of the Company's common stock prior to the adoption of the Rights Plan did not cause the Rights to become exercisable upon adoption of the Rights Plan. Should the Rights become exercisable, the effect would be to dilute the ownership of the beneficial owner(s) who triggered the Rights, as that beneficial owner or group of owners would not receive the Units.

(11) COMMON STOCK REPURCHASES AND UNDERWRITTEN OFFERING

Stock Buyback Program

On July 29, 2013, the Company announced that its Board of Directors had authorized a stock buyback program to repurchase up to \$100 million of the Company's common stock from time to time on the open market or in privately negotiated transactions. The timing and amount of any shares repurchased will be determined by the Company's management based on its evaluation of market conditions and other factors. The Company may elect to implement a 10b5-1 repurchase program, which would permit shares to be repurchased when the Company might otherwise be precluded from doing so under insider trading laws. The Company has not implemented such a 10b5-1 repurchase program to date. The stock buyback program may be suspended or discontinued at any time. The stock buyback program is being funded using the Company's working capital. During the six months ended June 27, 2014, the Company spent \$8.2 million, including transaction fees, to repurchase and retire 2.3 million shares of its common stock under the stock buyback program. At June 27, 2014, the Company had \$32.5 million remaining under the stock buyback program for future repurchases.

Underwritten Offering

On March 20, 2014, the Company announced the commencement of an underwritten public offering of 37.5 million shares of its common stock on behalf of Galahad Securities Limited and its affiliated entities (collectively, the "Legatum Group"). The underwriter of the offering was granted a 30-day option to purchase up to 5.625 million additional shares from the Legatum Group. The Legatum Group received all the proceeds from the underwritten offering; no shares in the underwritten offering were sold by Sonus or any of its officers or directors. Sonus purchased 21.5 million shares of its common stock from the underwriter for \$3.4882 per share, the price equal to the price paid by the underwriter to the Legatum Group in the underwritten offering, for a total of \$75.3 million, including transaction fees of \$0.3 million. This repurchase was not completed under the Company's stock buyback program. Sonus funded the share repurchase with cash on hand. The repurchased shares were retired upon completion of the transaction.

(12) STOCK-BASED COMPENSATION PLANS

Stock Incentive Plans

The Company's 2007 Stock Incentive Plan, as amended (the "2007 Plan"), provides for the award of options to purchase the Company's common stock ("stock options"), stock appreciation rights ("SARs"), restricted common stock ("restricted stock"), performance-based awards, restricted stock units ("RSUs") and other stock-based awards to employees, officers, directors (including those directors who are not employees or officers of the Company), consultants and advisors of the

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

Company and its subsidiaries.

The Company's 2008 Stock Incentive Plan provides for the award of stock options, SARs, restricted stock, performance-based awards and RSUs to former employees of NET who subsequently became employees of Sonus and Sonus employees hired subsequent to the August 24, 2012, the date the Company acquired NET.

In connection with the acquisition of PT, the Company assumed PT's 2012 Amended Performance Technologies, Incorporated Omnibus Incentive Plan (the "PT 2012 Plan"), which provides for the award of stock options, SARs, restricted stock, performance-based awards and restricted stock units. The Company also assumed all of the outstanding options to purchase common stock under the Performance Technologies, Incorporated 2003 Omnibus Incentive Plan (the "PT 2003 Plan") and the Performance Technologies, Incorporated 2001 Stock Option Plan (the "PT 2001 Plan"); however, no future equity awards may be granted under either the PT 2003 Plan or the PT 2001 Plan.

The options to purchase PT common stock under the PT 2012 Plan, the PT 2003 Plan and the PT 2001 Plan were converted into options to purchase Sonus common stock (the "converted awards"), and the shares of PT common stock available for future grant under the PT 2012 Plan were converted into shares of Sonus common stock available for future grant, using a conversion factor of 1.23, which was calculated based on the acquisition consideration of \$3.75 per share of PT's common stock divided by the average of the closing price of Sonus' common stock for the ten consecutive days ending with the third trading day that preceded the closing date. This conversion factor was also used to convert the exercise prices of PT stock options to Sonus stock option exercise prices. The converted awards will vest under the same schedules as the respective PT stock options.

The fair values of the PT stock options assumed were estimated using a Black-Scholes option pricing model. The Company recorded \$1.7 million as additional purchase consideration for the fair value of the assumed equity awards. The fair value of the assumed awards attributable to future stock-based compensation expense totaled \$0.9 million, which is being recorded over a weighted average period of approximately one year.

Executive and Board of Directors Equity Arrangements

On June 11, 2014, the Company modified the options outstanding as of that date that had been granted to the Company's non-employee members of the Board of Directors (the "Board Members") to extend the exercise period to the lesser of three years from the date that a Board Member stepped down from his or her position on the Board of Directors or the remaining contractual life of the respective stock options. In connection with this modification, the Company recorded \$0.7 million of incremental stock-based compensation expense in the three months ended June 27, 2014. This expense is included as a component of General and administrative expense in the Company's condensed consolidated statements of operations for both the three and six months ended June 27, 2014.

On January 2, 2014, Raymond P. Dolan, the Company's President and Chief Executive Officer ("Mr. Dolan"), elected to accept shares of restricted stock in lieu of base salary for the period from January 1, 2014 through December 31, 2014. Accordingly, the Company granted Mr. Dolan 243,507 shares of restricted stock (the "2014 Dolan Salary Shares") on January 2, 2014. The number of shares granted was calculated by dividing an amount equal to 1.5 times Mr. Dolan's base salary for the period from January 1, 2014 through December 31, 2014 by \$3.08, the closing price of the Company's common stock on the date of grant. The 2014 Dolan Salary Shares will vest on December 31, 2014. If Mr. Dolan's employment is terminated by Mr. Dolan with Good Reason (as defined in his employment agreement, as amended) or his employment is terminated by the Company without Cause (as defined in his employment agreement, as amended) before December 31, 2014, a pro rata portion of the 2014 Dolan Salary Shares will vest on the date of such termination. If Mr. Dolan terminates his employment without Good Reason or his employment is terminated by the Company for Cause before December 31, 2014, he will forfeit the 2014 Dolan Salary Shares. The Company is recording stock-based compensation expense related to the 2014 Dolan Salary Shares ratably for the period of January 1, 2014 through December 31, 2014. The 2014 Dolan Salary Shares are included in the amount reported as "Granted" in the restricted stock grant table below.

On January 22, 2014, 21 executives of the Company, including Mr. Dolan, were given the choice to receive all or half of their fiscal year 2014 bonuses (the "2014 Bonus"), if any are earned, in the form of shares of the Company's common stock (the "2014 Bonus Shares"). Each executive could also elect not to participate in this program and to earn his or her 2014 Bonus, if

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

any, in the form of cash. The amount of the 2014 Bonus, if any, for each executive shall be determined by the Compensation Committee of the Board of Directors of the Company (the "Compensation Committee"). The number of shares of the Company's common stock that will be granted to those executives who elected to receive their 2014 Bonus entirely in the form of shares of common stock will be calculated by dividing an amount equal to 1.5 times each executive's 2014 Bonus earned by \$3.08, the closing price of the Company's common stock on January 2, 2014. The number of shares of the Company's common stock that will be granted to those executives who elected to receive one-half of their 2014 Bonus in the form of shares of common stock will be calculated by dividing an amount equal to 1.5 times one-half of each executive's 2014 Bonus earned by \$3.08, with the cash portion equal 50% of their respective 2014 Bonus earned. The 2014 Bonus, if any, will be granted and/or paid on a date concurrent with the timing of the payout of bonuses under the Company-wide incentive bonus program. The 2014 Bonus Shares, if any are granted, will be fully vested on the date of grant. Of the eligible executives, 17 elected to receive their entire 2014 Bonus in shares of common stock and 4 elected to receive 50% of their 2014 Bonus in shares of common stock and 50% in cash. As of June 27, 2014, the Company determined that the grant date criteria for the 2014 Bonus Shares had not been met; accordingly, the Company is marking to market the 2014 Bonus Shares expected to be earned and recording expense based on the aggregate fair value of the 2014 Bonus Shares at June 27, 2014.

In March 2013, 21 executives of the Company, including Mr. Dolan, elected to receive their fiscal year 2013 bonuses (the "2013 Bonus"), if any were earned, in the form of shares of the Company's common stock (the "2013 Bonus Shares"). The 2013 Bonus Shares were granted on February 18, 2014 and vested immediately. The Company granted approximately one million 2013 Bonus Shares, with the number of shares granted calculated by dividing amounts equal to 1.5 times the respective 2013 Bonus amounts earned, as determined by the Compensation Committee, by \$3.30, the closing price of the Company's common stock on the date of grant. The Company recorded stock-based compensation expense for the 2013 Bonus Shares from January 1, 2013 through the grant date. These shares are reported as both "Granted" and "Vested" in the restricted stock grant table below.

On February 14, 2013, the Compensation Committee determined that eight executives of the Company, excluding Mr. Dolan, would receive their bonuses with respect to fiscal 2012 in the form of restricted shares of the Company's common stock equal to 100% of their respective target bonus amounts for fiscal 2012 (the "Executive Bonus Shares"). 50% of the Executive Bonus Shares vested on August 15, 2013 and the remaining 50% vested on February 15, 2014. The Company recorded the unamortized expense related to the Executive Bonus Shares as stock-based compensation expense through February 15, 2014. These shares are reported as "Vested" in the restricted stock grant table below.

On August 7, 2012, Mr. Dolan elected to receive his fiscal year 2012 bonus, if earned, in the form of restricted shares of the Company's common stock (the "Dolan Bonus Shares"). 50% of the Dolan Bonus Shares vested on August 15, 2013 and the remaining 50% vested on February 15, 2014. The Company recorded the unamortized stock-based compensation expense related to the Dolan Bonus Shares through February 15, 2014.

On February 11, 2014, the Board of Directors increased its number of members from nine to eleven. In connection with their appointments, on February 18, 2014, each new director received a grant of shares of restricted stock with a grant date fair value of \$100,000, with the number of shares granted calculated by dividing \$100,000 by \$3.30, the closing price of the Company's stock on the date of grant, and \$100,000 of options to purchase the Company's common stock, with the number of shares calculated by dividing \$100,000 by the grant date fair value of an option to purchase one share of common stock as determined by using the Black-Scholes valuation model. These awards vested on June 11, 2014, the date of the Company's 2014 Annual Meeting of Stockholders. Each of the new directors also elected to receive their 2014 annual retainers in shares of common stock in lieu of cash. Additionally, an incumbent member of the Board was appointed Chairman of a new committee and elected to receive his incremental retainer for this chairmanship in shares of the Company's common stock. These retainer shares were granted on February 18, 2014, of which 50% vested immediately and the remaining 50% vested on July 1, 2014. The Company granted options to purchase approximately 135,000 shares of common stock and 88,000 shares of restricted common stock in the three months ended March 28, 2014 in connection with these actions. These stock options and restricted stock awards are reported as "Granted" and, as applicable, as "Vested" in the respective tables below.

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

Stock Options

The activity related to the Company's outstanding stock options during the six months ended June 27, 2014 is as follows:

	Number of Shares	Weighted Average sercise Price	Weighted Average Remaining Contractual Term (years)	Intri	ggregate insic Value housands)
Outstanding at January 1, 2014	33,136,112	\$ 3.22			
Granted	10,950,616	\$ 3.59			
PT outstanding options converted to Sonus options	1,283,058	\$ 1.73			
Exercised	(1,903,055)	\$ 2.41			
Forfeited	(1,295,826)	\$ 2.80			
Expired	(550,019)	\$ 5.04			
Outstanding at June 27, 2014	41,620,886	\$ 3.30	7.27	\$	21,175
Vested or expected to vest at June 27, 2014	39,613,270	\$ 3.32	7.21	\$	19,706
Exercisable at June 27, 2014	18,299,837	\$ 3.50	5.14	\$	10,896

The grant date fair values of options to purchase common stock granted in the three and six months ended June 27, 2014 were estimated using the Black-Scholes valuation model with the following assumptions:

	Three months ended June 27, 2014	Six months ended June 27, 2014
Risk-free interest rate	1.66%	1.53% - 2.70%
Expected dividends	_	_
Weighted average volatility	53.0%	61.3%
Expected life (years)	4.5	4.5 - 6.0

Additional information regarding the Company's stock options for the three and six months ended June 27, 2014 is as follows:

	Three mor	ths ended	Six months ended
	June 20	,	June 27, 2014
Weighted average grant date fair value of stock options granted	\$	1.48	\$ 1.66
Total intrinsic value of stock options exercised (in thousands)	\$	820	\$ 2,409
Cash received from the exercise of stock ontions (in thousands)	\$	1 097	\$ 4 541

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

Restricted Stock Awards

The activity related to the Company's unvested restricted stock awards for the six months ended June 27, 2014 is as follows:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance at January 1, 2014	1,238,765	\$ 2.82
Granted	1,907,097	\$ 3.31
Vested	(1,631,790)	\$ 3.17
Forfeited	_	\$ _
Unvested balance at June 27, 2014	1,514,072	\$ 3.06

The total fair value of shares of restricted stock that vested during the six months ended June 27, 2014 was \$5.2 million.

Performance-Based Stock Awards

The activity related to the Company's performance-based stock awards for the six months ended June 27, 2014 is as follows:

	Shares	Weighted Average Grant Date Fair Value
Unvested balance at January 1, 2014	1,059,541	\$ 2.60
Granted	_	\$ _
Vested	(422,562)	\$ 2.60
Forfeited	(205,729)	\$ 2.43
Unvested balance at June 27, 2014	431,250	\$ 2.72

Employee Stock Purchase Plan

At the February 2014 meeting of the Board of Directors, the ESPP was amended, effective March 1, 2014, to provide for six-month offering periods with the purchase price of the stock equal to 85% of the lesser of the market price on the first or last day of the offering period. The maximum number of shares of common stock an employee may purchase during each offering period is 2,500, subject to certain adjustments pursuant to the ESPP.

Stock-Based Compensation

The condensed consolidated statements of operations include stock-based compensation for the three and six months ended June 27, 2014 and June 28, 2013 as follows (in thousands):

	Three months ended				Six months ended			
	J	une 27, 2014		June 28, 2013		June 27, 2014		June 28, 2013
Product cost of revenue	\$	104	\$	30	\$	183	\$	82
Service cost of revenue		412		252		691		462
Research and development		1,749		820		3,062		1,499
Sales and marketing		1,303		1,219		2,552		2,318
General and administrative		3,370		2,219		6,224		4,403
	\$	6,938	\$	4,540	\$	12,712	\$	8,764

Notes to Condensed Consolidated Financial Statements (Continued)

(unaudited)

There is no income tax benefit for employee stock-based compensation expense for the three and six months ended June 27, 2014 or June 28, 2013 due to the valuation allowance recorded.

At June 27, 2014, there was \$38.6 million, net of expected forfeitures, of unrecognized stock-based compensation expense related to unvested stock options and restricted stock awards. This expense is expected to be recognized over a weighted average period of approximately three years.

(13) MAJOR CUSTOMERS

The following customers each contributed 10% or more of the Company's revenue in at least one of the three or six month periods ended June 27, 2014 and June 28, 2013:

	Three mon	ths ended	Six months ended		
	June 27, 2014	June 28, 2013	June 27, 2014	June 28, 2013	
AT&T Inc.	20%	22%	24%	17%	
Verizon	*	11%	*	10%	

^{*} Represents less than 10% of revenue

At June 27, 2014, two customers each accounted for 10% or more of the Company's accounts receivable balance, representing approximately 31% in the aggregate of the Company's accounts receivable balance. At December 31, 2013, one customer accounted for 10% or more of the Company's accounts receivable balance, representing approximately 13% of the Company's accounts receivable balance. The Company performs ongoing credit evaluations of its customers and generally does not require collateral on accounts receivable. The Company maintains an allowance for doubtful accounts and such losses have been within management's expectations.

(14) GEOGRAPHIC INFORMATION

The Company's classification of revenue by geographic area is determined by the location to which the product is shipped or where the services are performed. The following table summarizes revenue by geographic area as a percentage of total revenue:

	Three month	is ended	Six months ended		
	June 27, 2014	June 28, 2013	June 27, 2014	June 28, 2013	
United States	71%	74%	72%	72%	
Europe, Middle East and Africa	14	11	13	10	
Japan	9	10	8	13	
Other Asia Pacific	4	4	4	4	
Other	2	1	3	1	
	100%	100%	100%	100%	

International revenue, both as a percentage of total revenue and absolute dollars, may vary from one period to the next, and accordingly, historical data may not be indicative of future periods.

(15) INCOME TAXES

The Company's income tax provisions for the six months ended June 27, 2014 and June 28, 2013 reflect the Company's

Notes to Condensed Consolidated Financial Statements (Continued) (unaudited)

estimates of the effective rates expected to be applicable for the respective full years, adjusted for any discrete events, which are recorded in the period that they occur. These estimates are reevaluated each quarter based on the Company's estimated tax expense for the full year. The estimated effective rates for the six months ended June 27, 2014 and June 28, 2013 do not include any benefit for the Company's domestic losses, as the Company has concluded that a valuation allowance on any domestic benefit is required.

(16) COMMITMENTS AND CONTINGENCIES

The Company is often a party to disputes and legal proceedings that it considers routine and incidental to its business. In the normal course of business, the Company enters into contractual commitments to purchase services, materials, components, and finished goods from suppliers. Under agreements with certain contract manufacturers, the Company may be liable for purchased raw materials procured for the Company by the applicable contract manufacturer. Management does not expect the results of any of these actions to have a material effect on the Company's business or consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of the financial condition and results of operations of Sonus Networks, Inc. should be read in conjunction with the condensed consolidated financial statements and the related notes thereto included elsewhere in this Quarterly Report on Form 10-Q and the audited financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2013, which was filed with the U.S. Securities and Exchange Commission effective February 28, 2014.

Overview

We are a leading provider of networked solutions for communications service providers (e.g., telecommunications, wireless and cable service providers) and enterprises to help them advance, protect and unify their voice and data communication networks, reduce expenses and position themselves to provide new services to their customers. We help many of the world's leading communications service providers and enterprises implement the next generation of Session Initiation Protocol ("SIP")-based solutions, including Voice over IP ("VoIP") and Unified Communications ("UC") through secure, reliable and scalable Internet Protocol ("IP") networks. We also provide tightly integrated signaling and advanced routing capabilities and applications that span the mission-critical demands of both existing and next-generation 4G LTE and IMS telecommunications networks. Our products include session border controllers ("SBCs"), diameter signaling controllers ("DSCs"), policy/routing servers, media and signaling gateways and network analytics tools. Our solutions address the need for communications service providers and enterprises to seamlessly link and leverage multivendor, multiprotocol communications systems and applications across a single network infrastructure. Previously, companies were required to implement separate networks for their voice and data applications. In a rapidly changing ecosystem of IP-enabled devices such as smartphones and tablets, companies want an infrastructure that enables the integration of voice and data capability into a single application on one integrated network. Our solutions help our customers realize the intended value and benefits of UC, both in public and private clouds, by enabling disparate vendor communications environments, commonplace in most enterprises today, to work seamlessly together. Likewise, our solutions enable the deployment and adoption of cloud-based communications.

We utilize both direct and indirect sales channels to reach our target customers. Customers and prospective customers in the service provider space are traditional and emerging communications service providers, including long distance carriers, local exchange carriers, Internet service providers, wireless operators, cable operators, international telephone companies and carriers that provide services to other carriers. Enterprise customers and target enterprise customers include financial institutions, retailers, state and local governments, and other multinational corporations. We collaborate with our customers to identify and develop new, advanced services and applications that can help to reduce costs, improve productivity and generate new revenue.

We have traditionally sold our products principally through a global direct sales force, with additional sales support from regional channel partners throughout the world. In 2012, we launched an expanded channel partner program, the Sonus Partner Assure Program, to expand our coverage of the service provider and enterprise market opportunities. We continue to expand this program, including the introduction in 2013 of a two-tier distribution channel model.

In concert with our Sonus Partner Assure Program, we enhanced our flagship SBC 5200 to be more enterprise- and channel-centric and launched a new SBC, the Sonus SBC 5100, to address the enterprise requirements for smaller regional office and branch offices as a result of their VoIP and SIP deployments.

On July 30, 2014, we announced that on July 29, 2014, Todd Abbott ("Mr. Abbott") stepped down as Executive Vice President of Strategy and Go-to-Market. Mr. Abbott will remain with the Company in an advisory role to assist in the transition of his duties until October 17, 2014.

On February 19, 2014 (the "PT Acquisition Date"), we completed the acquisition of Performance Technologies, Incorporated ("PT"), a Delaware corporation, for \$3.75 per share, or approximately \$34 million in cash, net of PT's cash and excluding acquisition-related costs. This acquisition has enabled us to expand and diversify our portfolio with an integrated, virtualized Diameter and SIP-based solution and deliver strategic value to service providers seeking to offer new multimedia services through mobile, cloud-based real-time communications. The financial results of PT are included in our condensed consolidated financial statements for the three months ended June 27, 2014 and for the period subsequent to the PT Acquisition Date for the six months ended June 27, 2014.

On June 20, 2014, we sold the PT Multi-Protocol Server ("MPS") business for \$2.0 million to an affiliate of Sunhillo Corporation. We had acquired the MPS business in connection with the acquisition of PT. The results of operations of the MPS business are excluded from our consolidated results for the period subsequent to the June 20, 2014.

On February 24, 2014, we announced our new Sonus SBC 7000 (the "SBC 7000"), which is designed to address scalability requirements for real-time, multimedia communications with the capability to license up to 150,000 sessions. The SBC 7000 is purpose-built to support emerging services such as high definition voice and video, Voice over Long-Term Evolution ("VoLTE") and Rich Communications Services ("RCS"). During the second quarter of fiscal 2014, this product became generally available for purchase by our customers.

Our strategy is designed to capitalize on our technology and market lead, and build a premier franchise in multimedia infrastructure solutions. We are currently focusing our major efforts on the following aspects of our business which enable next generation communications including SIP- and 4G/LTE-based networks.

- expanding our communications network solutions to address emerging UC-, IP- and cloud-based enterprise and service providers;
- embracing the principles outlined by 3GPP, 4GPP2 and LTE architectures and delivering the industry's most advanced IMS (IP Multimedia Subsystem)-ready SBC and DSC product suites;
- leveraging our TDM (time division multiplexing)-to-IP gateway technology leadership with service providers to accelerate adoption of SIP-enabled Unified Communication services:
- expanding and broadening our customer base by targeting the enterprise market for SIP trunking and access solutions;
- assisting our customers' ability to differentiate themselves by offering a sophisticated application development platform and service creation environment;
- · expanding our global sales distribution, marketing and support capabilities, including continued expansion of our indirect sales channel program;
- actively contributing to the SIP standards definition and adoption process;
- pursuing strategic transactions and alliances; and
- delivering sustainable profitability by continuing to improve our overall performance.

We reported losses from operations of \$4.8 million for the three months ended June 27, 2014 and \$4.6 million for the three months ended June 28, 2013. We reported losses from operations of \$10.6 million for the six months ended June 27, 2014 and \$18.1 million for the six months ended June 28, 2013.

We reported net losses of \$5.5 million for the three months ended June 27, 2014 and \$4.9 million for the three months ended June 28, 2013. We reported net losses of \$9.5 million for the six months ended June 27, 2014 and \$18.6 million for the six months ended June 28, 2013.

Our revenue was \$75.6 million in the three months ended June 27, 2014 and \$69.2 million in the three months ended June 28, 2013. Our revenue was \$146.3 million in the six months ended June 27, 2014 and \$132.5 million in the six months ended June 28, 2013.

Our gross profit was \$47.3 million in the three months ended June 27, 2014 and \$44.0 million in the three months ended June 28, 2013. Our gross profit was \$93.7 million in the six months ended June 27, 2014 and \$81.8 million in the six months ended June 28, 2013.

Our gross profit as a percentage of revenue ("total gross margin") was 62.6% in the three months ended June 27, 2014 and 63.6% in the three months ended June 28, 2013. Our total gross margin was 64.0% in the six months ended June 27, 2014 and 61.8% in the six months ended June 28, 2013.

Our operating expenses were \$52.1 million in the three months ended June 27, 2014, compared to \$48.6 million in the three months ended June 28, 2013, and \$104.3 million in the six months ended June 27, 2014, compared to \$99.9 million in the six months ended June 28, 2013. Our operating expenses for the three months ended June 27, 2014 include \$0.4 million of restructuring expense. Our operating expenses for the three months ended June 28, 2013 include \$1.7 million of restructuring expense. Our operating expenses for the six months ended June 27, 2014 include \$1.3 million of acquisition-related expense and \$1.6 million of restructuring expense. Our operating expenses for the six months ended June 28, 2013 include \$3.6 million of restructuring expense.

We recorded stock-based compensation expense of \$6.9 million in the three months ended June 27, 2014 and \$4.5 million in the three months ended June 28, 2013. We recorded stock-based compensation expense of \$12.7 million in the six months ended June 27, 2014 and \$8.8 million in the six months ended June 28, 2013. The stock-based compensation actions described below increased stock-based compensation expense while reducing cash salary and bonus expenses in both three and six month periods.

See "Results of Operations" in this Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") for a discussion of these changes in our revenue and expenses.

In the three months ended March 28, 2014, we reached a settlement agreement for \$2.25 million to recover a portion of our losses related to the impairment of certain prepaid royalties which we had written off in fiscal 2012. This amount is included in Other income in our condensed consolidated statement of operations for the six months ended June 27, 2014.

On June 11, 2014, the Company modified the stock options outstanding as of that date that had been granted to the Company's non-employee members of the Board of Directors (the "Board Members") to extend the exercise period to the lesser of three years from the date that a Board Member stepped down from his or her position on the Board of Directors or the remaining contractual life of the respective stock options. In connection with this modification, the Company recorded \$0.7 million of incremental stock-based compensation expense in the three months ended June 27, 2014. This expense is included as a component of General and administrative expense in the Company's condensed consolidated statements of operations for both the three and six months ended June 27, 2014.

On January 2, 2014, Raymond P. Dolan, our President and Chief Executive Officer ("Mr. Dolan") elected to accept shares of restricted stock in lieu of base salary for the period from January 1, 2014 through December 31, 2014. Accordingly, we granted Mr. Dolan 243,507 shares of restricted stock (the "2014 Dolan Salary Shares") on January 2, 2014. The number of shares granted was calculated by dividing an amount equal to 1.5 times Mr. Dolan's base salary for the period from January 1, 2014 through December 31, 2014 by \$3.08, the closing price of our common stock on the date of grant. The 2014 Dolan Salary Shares will vest on December 31, 2014. If Mr. Dolan's employment is terminated by Mr. Dolan with Good Reason (as defined in his employment agreement, as amended) or his employment is terminated by us without Cause (as defined in his employment agreement, as amended) before December 31, 2014, a pro rata portion of the 2014 Dolan Salary Shares will vest on the date of such termination. If Mr. Dolan terminates his employment without Good Reason or his employment is terminated by us for Cause before December 31, 2014, he will forfeit the 2014 Dolan Salary Shares. We are recording stock-based compensation expense related to the 2014 Dolan Salary Shares ratably for the period of January 1, 2014 through December 31, 2014.

On January 22, 2014, 21 of our executives, including Mr. Dolan, were given the choice to receive all or half of their fiscal year 2014 bonuses (the "2014 Bonus"), if any are earned, in the form of shares of our common stock (the "2014 Bonus Shares"). Each executive could also elect not to participate in this program and to earn his or her 2014 Bonus, if any, in the form of cash. The amount of the 2014 Bonus, if any, for each executive shall be determined by the Compensation Committee of our Board of Directors (the "Compensation Committee"). The number of shares of our common stock that will be granted to

those executives who elected to receive their 2014 Bonus entirely in the form of shares of common stock will be calculated by dividing an amount equal to 1.5 times each executive's 2014 Bonus earned by \$3.08, the closing price of our common stock on January 2, 2014. The number of shares of common stock that will be granted to those executives who elected to receive one-half of their 2014 Bonus in the form of shares of common stock will be calculated by dividing an amount equal to 1.5 times one-half of each executive's 2014 Bonus earned by \$3.08, with the cash portion equal 50% of their respective 2014 Bonus earned. The 2014 Bonus, if any, will be granted and/or paid on a date concurrent with the timing of the payout of bonuses under the Company-wide incentive bonus program. The 2014 Bonus Shares, if any are granted, will be fully vested on the date of grant. Of the eligible executives, 17 elected to receive their entire 2014 Bonus in shares of common stock and 4 elected to receive 50% of their 2014 Bonus in shares of common stock and 50% in cash. As of June 27, 2014, we determined that the grant date criteria for the 2014 Bonus Shares had not been met; accordingly, we are marking to market the 2014 Bonus Shares expected to be earned and recording expense based on the aggregate fair value of the 2014 Bonus Shares at June 27, 2014.

In March 2013, 21 executives of the Company, including Mr. Dolan, elected to receive their fiscal year 2013 bonuses (the "2013 Bonus"), if any were earned, in the form of shares of our common stock (the "2013 Bonus Shares"). The 2013 Bonus Shares were granted on February 18, 2014 and vested immediately. We granted approximately one million 2013 Bonus Shares, with the number of shares granted calculated by dividing amounts equal to 1.5 times the respective 2013 Bonus amounts earned, as determined by the Compensation Committee, by \$3.30, the closing price of our common stock on the date of grant. We recorded stock-based compensation expense for the 2013 Bonus Shares from January 1, 2013 through the grant date.

On February 14, 2013, the Compensation Committee determined that eight executives of the Company, excluding Mr. Dolan, would receive their bonuses with respect to fiscal 2012 in the form of restricted shares of our common stock equal to 100% of their respective target bonus amounts for fiscal 2012 (the "Executive Bonus Shares"). 50% of the Executive Bonus Shares vested on August 15, 2013 and the remaining 50% vested on February 15, 2014. We recorded the unamortized expense related to the Executive Bonus Shares as stock-based compensation expense through February 15, 2014.

On August 7, 2012, Mr. Dolan elected to receive his fiscal year 2012 bonus, if earned, in the form of restricted shares of our common stock (the "Dolan Bonus Shares"). 50% of the Dolan Bonus Shares vested on August 15, 2013 and the remaining 50% vested on February 15, 2014. We recorded the unamortized stock-based compensation expense related to the Dolan Bonus Shares through February 15, 2014.

On February 11, 2014, the Board of Directors increased its number of members from nine to eleven. In connection with their appointments, on February 18, 2014, each new director received a grant of shares of restricted stock with a grant date fair value of \$100,000, with the number of shares granted calculated by dividing \$100,000 by \$3.30, the closing price of our common stock on the date of grant, and \$100,000 of options to purchase our common stock, with the number of shares calculated by dividing \$100,000 by the grant date fair value of an option to purchase one share of common stock as determined by using the Black-Scholes valuation model. These awards vested on June 11, 2014, the date of our 2014 Annual Meeting of Stockholders. Each of the new directors also elected to receive their 2014 annual retainers in shares of common stock in lieu of cash. Additionally, an incumbent member of the Board was appointed Chairman of a new committee and elected to receive his incremental retainer for this chairmanship in shares of our common stock. These retainer shares were granted on February 18, 2014, with50% vesting immediately while the remaining 50% vested on July 1, 2014. We granted options to purchase approximately 135,000 shares of common stock and 88,000 shares of restricted common stock in the first quarter of fiscal 2014 in connection with these actions.

Critical Accounting Policies and Estimates

Management's discussion and analysis of financial condition and results of operations is based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates and judgments on historical experience, knowledge of current conditions and beliefs of what could occur in the future given available information. We consider the following accounting policies to be both those most important to the portrayal of our financial condition and those that require the most subjective judgment. If actual results differ significantly from management's estimates and projections, there could be a material effect on our condensed consolidated financial statements. The significant accounting policies that we believe are the most critical include the following:

Revenue recognition;

- · Valuation of inventory;
- · Loss contingencies and reserves;
- · Stock-based compensation;
- Business combinations;
- · Goodwill and intangible assets; and
- Accounting for income taxes.

For a further discussion of our critical accounting policies and estimates, please refer to our Annual Report on Form 10-K for the fiscal year ended December 31, 2013. There were no significant changes to our critical accounting policies from December 31, 2013 through June 27, 2014.

Results of Operations

Three and six months ended June 27, 2014 and June 28, 2013

Revenue. Revenue for the three and six months ended June 27, 2014 and June 28, 2013 was as follows (in thousands, except percentages):

	Three months ended				Increase from prior year			
	June 27, 2014		June 28, 2013		\$	%		
Product	\$ 45,845	\$	42,939	\$	2,906	6.8%		
Service	29,725		26,254		3,471	13.2%		
Total revenue	\$ 75,570	\$	69,193	\$	6,377	9.2%		

	Six months ended				Increase from prior year		
	June 27, 2014		June 28, 2013		\$	%	
Product	\$ 90,985	\$	80,735	\$	10,250	12.7%	
Service	55,327		51,746		3,581	6.9%	
Total revenue	\$ 146,312	\$	132,481	\$	13,831	10.4%	

Product revenue is comprised of sales of our communication infrastructure products. Our Legacy product offerings, primarily trunking and SS7 signaling, include our GSX9000 and GSX4000 Open Services Switches, our ASX Voice Application Server and our STP Signal Transfer Point solution. Our Growth-related product offerings include our Session Border Controllers, including the SBC 9000, our newly released SBC 7000, and the SBC 5200, SBC 5100, SBC 2000 and SBC 1000, SBC SWe, and SBC VX; and our Diameter Signaling Controller, the DSC 8000.

Certain of our products may be incorporated into either our Legacy product revenue or Growth-related product revenue categories, depending on the application of the product within a customer's network. These products include, but are not limited to, our PSX Policy & Routing Server, GSX 9000, SGX Signaling Gateway, Sonus Insight Management System, ASX Access Gateway Control Function and our suite of network analytical products. Sales of gateway products used in connection with a Time Division Multiplexing ("TDM") network are classified as Legacy product revenue. The key differentiator for the Growth-related product revenue is whether the products we provide are used as solutions, which enable next-generation networks such as SIP and 4G/LTE.

Product revenue for the three and six months ended June 27, 2014 and June 28, 2013 was comprised of the following (in thousands, except percentages):

	Three months ended				Increase (decrease) from prior year			
	June 27, 2014		June 28, 2013		\$	%		
Legacy product revenue	\$ 17,215	\$	22,490	\$	(5,275)	(23.5)%		
Growth-related product revenue	28,630		20,449		8,181	40.0 %		
	\$ 45,845	\$	42,939	\$	2,906	6.8 %		

	Six months ended				Increase (decrease) from prior year			
	June 27, 2014			June 28, 2013	\$	%		
Legacy product revenue	\$	29,532	\$	36,776	\$ (7,244)	(19.7)%		
Growth-related product revenue		61,453		43,959	17,494	39.8 %		
	\$	90,985	\$	80,735	\$ 10,250	12.7 %		

We have anticipated that as a result of the transition of our customers, our business and the overall market to SBC and Diameter, our revenue from sales of our Legacy products will decrease over time, with the decline more than offset by increases in sales of our Growth-related products. This decline is not expected to be completely linear, as customers will from time to time require additional capacity and expansion to their existing legacy applications infrastructures. We expect that our product revenue in fiscal 2014 will increase from fiscal 2013 levels, primarily due to increased sales of our Growth-related products resulting from our continued and increasing focus on expanding our product offerings to address emerging Unified Communication and IP-based markets, such as SBC, in the enterprise and service provider markets, as well as sales from Diameter products as a result of our recent acquisition of PT.

The transition to all-IP networks, which the industry is trending toward over time, is an important part of both our customers' and our strategy for growth. This trend has led to increased capital expenditures from certain customers as they continue to migrate their legacy networks. During the first half of fiscal 2014 we received various purchase orders for our GSX 9000 product solution from a large customer that required additional capacity to scale its IP infrastructure and support its transition to an all-IP network. We have determined that based upon the usage case that drove the customer's purchasing decision, these orders would be more accurately reflected within the Growth-related product revenue category rather than the Legacy revenue product category, as the GSX 9000 product will be used to help secure, manage, control or migrate traffic to IP network infrastructures. Accordingly, we have adjusted the product revenue components reported for the three months ended March 28, 2014 by reclassifying \$6.6 million of product revenue from Legacy to Growth-related. This adjustment is reflected in the product revenue components reported above for the six months ended June 27, 2014.

In the three months ended June 27, 2014, approximately 29% of product revenue was from indirect sales through our channel program, compared to approximately 16% in the three months ended June 28, 2013. Approximately 24% of product revenue in the six months ended June 27, 2014 was from indirect sales through our channel program, compared to approximately 16% in the six months ended June 28, 2013. These increases were due to the actions that we have taken to expand both our SBC portfolio and our sales opportunities.

In the three months ended June 27, 2014, our product revenue from sales to enterprise customers was approximately 20% of our total product revenue, compared too approximately 21% in the three months ended June 28, 2013. Approximately 20% of our product revenue was from sales to enterprise customers in the six months ended June 27, 2014, compared to approximately 32% in the six months ended June 28, 2013. These sales were made both through our direct sales team and indirect sales channel partners.

We recognized product revenue totaling \$6.6 million from 227 new customers in the three months ended June 27, 2014 and \$4.5 million from 190 new customers in the three months ended June 28, 2013. We recognized product revenue totaling \$9.9 million from 400 new customers in the six months ended June 27, 2014 and \$5.8 million from 353 new customers in the six months ended June 28, 2013. New customers are those from whom we recognize revenue for the first time in a reporting period, although we may have had outstanding orders from such customers for several years, especially for certain multi-year projects. The timing of the completion of customer projects, revenue recognition criteria satisfaction and customer payments included in multiple element arrangements may cause our product revenue to fluctuate from one period to the next.

Service revenue is primarily comprised of hardware and software maintenance and support ("maintenance revenue") and network design, installation and other professional services ("professional services revenue").

Service revenue for the three and six months ended June 27, 2014 and June 28, 2013 was comprised of the following (in thousands, except percentages):

	Three months ended				Increase from prior year		
	June 27, 2014		June 28, 2013		\$	%	
Maintenance	\$ 23,032	\$	20,843	\$	2,189	10.5%	
Professional services	6,693		5,411		1,282	23.7%	
	\$ 29,725	\$	26,254	\$	3,471	13.2%	

	Six months ended				Increase from prior year		
	 June 27, 2014		June 28, 2013		\$	%	
Maintenance	\$ 43,557	\$	41,691	\$	1,866	4.5%	
Professional services	11,770		10,055		1,715	17.1%	
	\$ 55,327	\$	51,746	\$	3,581	6.9%	

Our maintenance revenue increased in both the three and six month periods ended June 27, 2014 compared to the same prior year periods, primarily due to our larger installed customer base. The timing of the completion of projects for revenue recognition, customer payments and maintenance contracts may cause our services revenue to fluctuate from one period to the next. We expect that our service revenue in fiscal 2014 will increase slightly from fiscal 2013 levels as a result of our larger installed customer base.

The following customers each contributed 10% or more of our revenue in at least one of the three and six month periods ended June 27, 2014 and June 28, 2013:

	Three mo	nths ended	Six months ended			
<u>Customer</u>	June 27, 2014	June 28, 2013	June 27, 2014	June 28, 2013		
AT&T Inc.	20%	22%	24%	17%		
Verizon	*	11%	*	10%		

^{*} Represents less than 10% of revenue

International revenue was approximately 29% of revenue in the three months ended June 27, 2014 and approximately 26% of revenue in the three months ended June 28, 2013. International revenue was approximately 28% of revenue in the six months ended June 27, 2014 and approximately 28% of revenue in the six months ended June 28, 2013. Due to the timing of project completions, we expect that the domestic and international components as a percentage of our revenue will fluctuate from quarter to quarter and year to year.

Our deferred product revenue was \$6.6 million at June 27, 2014 and \$14.8 million at December 31, 2013. Our deferred service revenue was \$44.2 million at June 27, 2014 and \$36.9 million at December 31, 2013. Our deferred revenue balance may fluctuate as a result of the timing of revenue recognition, customer payments, maintenance contract renewals, contractual billing rights and maintenance revenue deferrals included in multiple element arrangements.

Cost of Revenue/Gross Margin. Our cost of revenue consists primarily of amounts paid to third-party manufacturers for purchased materials and services, royalties, manufacturing and professional services personnel and related costs, and provision for inventory obsolescence. Our cost of revenue and gross margins for the three and six months ended June 27, 2014 and June 28, 2013 were as follows (in thousands, except percentages):

Service

Gross margin Product

Service

Total cost of revenue

Total gross margin

		Three months ended				from prior year		
		June 27, 2014		June 28, 2013		\$	%

(4.8)%

3.8 %

The decrease in product gross margin in the three months ended June 27, 2014 compared to the three months ended June 28, 2013 was primarily due to product and customer mix, including lower sales of higher-margin software products, which reduced our product gross margin by approximately four percentage points. The other key contributor to the decrease in product gross margin was higher manufacturing-related costs, which reduced our product gross margin by approximately one percentage point.

61.8%

The slight increase in product gross margin in the six months ended June 27, 2014 compared to the six months ended June 28, 2013 was primarily due to higher product revenue against certain fixed costs, which increased our product gross margin by approximately one percentage point, partially offset by slightly higher manufacturing costs, which reduced our product gross margin by approximately one half of one percentage point.

The increase in service gross margin in the three months ended June 27, 2014 compared to the three months ended June 28, 2013 was primarily due to lower fixed service costs, mainly the result of our restructuring actions, and lower third-party service costs, each of which increased our service gross margin by approximately three percentage points.

The increase in service gross margin in the six months ended June 27, 2014 compared to the six months ended June 28, 2013 was primarily due to lower fixed service costs resulting from our restructuring actions and operational efficiencies, which increased our service gross margin by approximately two percentage points, and lower third-party and variable service costs, which increased our service gross margin by approximately four percentage points.

We believe that our total gross margin over the next few years will be 60% or greater.

Research and Development Expenses. Research and development expenses consist primarily of salaries and related personnel expenses and prototype costs related to the design, development, testing and enhancement of our products. Research and development expenses for the three and six months ended June 27, 2014 and June 28, 2013 were as follows (in thousands, except percentages):

				from prior year					
	June 27, 2014				\$	%			
Three months ended	\$ 20,921	\$	18,019	\$	2,902	16.1%			
Six months ended	\$ 39,893	\$	35,520	\$	4,373	12.3%			

The increase in research and development expenses in the three months ended June 27, 2014 compared to the three months ended June 28, 2013 is attributable to \$3.5 million of higher employee-related expenses and \$0.2 million of higher product development (third-party development, prototype and equipment) expenses, partially offset by the absence in the current year quarter of \$0.6 million of expense for the impairment of intellectual property in the three months ended June 28, 2013, and lower amortization expense related to intangible assets and depreciation expense of \$0.1 million each. The increase in employee-related expenses in the three months ended June 27, 2014 is the result of \$2.5 million of higher salary and related expenses, \$0.9 million of higher stock-based compensation expense and \$0.1 million of net increases in other employee-related expenses.

The increase in research and development expenses in the six months ended June 27, 2014 compared to the six months ended June 28, 2013 is attributable to \$5.6 million of higher employee-related expenses and \$0.6 million of higher product development expenses. These increases were partially offset by the absence in the current year period of \$0.6 million of expense for the impairment of intellectual property, \$0.4 million of lower facilities expenses, \$0.3 million of lower depreciation expense, \$0.2 million of lower amortization expense related to intangible assets and \$0.3 million of net decreases in other research and development expenses. The increase in employee-related expenses in the six months ended June 27, 2014 is the result of \$3.8 million of higher salary and related expenses, \$1.6 million of higher stock-based compensation expense and \$0.2 million of net increases in other employee-related expenses.

Some aspects of our research and development efforts require significant short-term expenditures, the timing of which may cause significant variability in our expenses. We believe that rapid technological innovation is critical to our long-term success, and we are tailoring our investments to meet the requirements of our customers and market. We believe that our research and development expenses for fiscal 2014 will increase from fiscal 2013 levels due to our increased focus on new product development as well as the inclusion of expenses for PT.

Sales and Marketing Expenses. Sales and marketing expenses consist primarily of salaries and related personnel costs, commissions, travel and entertainment expenses, promotions, customer trial and evaluations inventory and other marketing and sales support expenses. Sales and marketing expenses for the three and six months ended June 27, 2014 and June 28, 2013 were as follows (in thousands, except percentages):

			Decrease from prior year				
	 June 27, 2014	June 28, 2013		\$	%		
Three months ended	\$ 18,782	\$ 19,191	\$	(409)	(2.1)%		
Six months ended	\$ 38,363	\$ 40,305	\$	(1,942)	(4.8)%		

The decrease in sales and marketing expenses in the three months ended June 27, 2014 compared to the three months ended June 28, 2013 is attributable to \$0.8 million of lower expense related to evaluation equipment at customer sites and \$0.3 million of net decreases in other sales and marketing expenses, partially offset by \$0.5 million of higher consulting expense and \$0.2 million of higher employee-related expenses.

The decrease in sales and marketing expenses in the six months ended June 27, 2014 compared to the six months ended June 28, 2013 is attributable to \$1.7 million of lower employee-related expenses, \$0.8 million of lower expense related to evaluation equipment at customer sites and \$0.3 million of net decreases in other sales and marketing expenses. These decreases were partially offset by \$0.5 million of higher consulting expense and \$0.4 million of higher marketing and trade show expense. The decrease in employee-related expenses was the result of \$1.5 million of lower salary and commissions and related expenses and net decreases of \$0.4 million in other employee-related expenses. These decreases were partially offset by \$0.2 million of higher stock-based compensation expense.

We believe that our sales and marketing expenses will increase in fiscal 2014 from fiscal 2013 levels, primarily attributable to increased personnel and related costs, including such costs attributable to the inclusion of expenses for PT, as well as our investment in our expanded sales and marketing programs.

General and Administrative Expenses. General and administrative expenses consist primarily of salaries and related personnel costs for executive and administrative personnel, recruiting expenses and audit and professional fees. General and administrative expenses for the three and six months ended June 27, 2014 and June 28, 2013 were as follows (in thousands, except percentages):

				from prior year					
	June 27, 2014				\$	%			
Three months ended	\$ 11,995	\$	9,733	\$	2,262	23.2%			
Six months ended	\$ 23,181	\$	20,443	\$	2,738	13.4%			

The increase in general and administrative expenses in the three months ended June 27, 2014 compared to the three months ended June 28, 2013 is attributable to \$1.6 million of higher employee-related expenses, \$0.4 million of expense related to the June 27, 2014 sale of PT's Multi-Protocol Server ("MPS") business, \$0.2 million of higher professional fees and \$0.1 million of net increases in other general and administrative expenses. The increase in employee-related expenses resulted from \$1.2 million of higher stock-based compensation expense, including \$0.7 million of incremental stock-based compensation expense related to the modification of outstanding stock options held by members of our Board of Directors described in the "Overview" of this MD&A, \$0.2 million of higher salary-related expenses and \$0.2 million of net increases in other employee-related expenses.

The increase in general and administrative expenses in the six months ended June 27, 2014 compared to the six months ended June 28, 2013 is attributable to \$2.5 million of higher employee-related expenses, \$0.4 million of expense related to the sale of the MPS business and \$0.3 million of higher professional fees, partially offset by \$0.5 million of net decreases in other general and administrative expenses. The increase in employee-related expenses resulted from \$1.8 million of higher stock-based compensation expense, including the aforementioned \$0.7 million related to the modification of stock options, \$0.4 million of higher salary-related expenses and \$0.3 million of net increases in other employee-related expenses.

We believe that our general and administrative expenses will increase in fiscal 2014 compared to fiscal 2013 levels, primarily due to higher stock-based compensation expense.

Acquisition-Related Expenses. Acquisition-related expenses include those costs related to the acquisition of PT that would otherwise not have been incurred by us. These costs are primarily comprised of professional and service fees, such as legal, audit, consulting, paying agent and other fees, and expenses related to cash payments to former PT executives under their respective PT change of control agreements. We recorded acquisition-related expenses of \$1.3 million in the six months ended June 27, 2014, comprised of \$1.1 million of professional and service fees and \$0.2 million related to payments under applicable change of control agreements with certain PT executives. We did not record acquisition-related expenses in the three months ended June 27, 2014 or either the three or six months ended June 28, 2013.

Restructuring Expense. We recorded restructuring expense of \$0.4 million in the three months ended June 27, 2014 and \$1.6 million in the six months ended June 27, 2014 for severance and related costs in connection with reducing our workforce. We recorded restructuring expense of \$1.7 million in the three months ended June 28, 2013, comprised of \$1.4 million for severance and related costs and \$0.3 million of to adjust our estimate of future sublease income. We recorded \$3.6 million of restructuring expense in the six months ended June 28, 2013, comprised of \$3.3 million for severance and related costs and \$0.3 million for facility costs.

Interest Income, net. Interest income and interest expense for the three and six months ended June 27, 2014 and June 28, 2013 were as follows (in thousands, except percentages):

		Three mo	nths ei	nded	Increase (decrease) from prior year			
	June 27, June 28, 2014 2013			\$	%			
Interest expense	\$	(31)	\$	(24)	\$	7	29.2 %	
Interest income		81		114		(33)	(28.9)%	
Interest income, net	\$	50	\$	90	\$	(40)	(44.4)%	

	Six months ended					Increase (decrease) from prior year				
	June 27, June 28, 2014 2013					\$	%			
Interest expense	\$	(56)	\$	(48)	\$	8	16.7 %			
Interest income		141		276		(135)	(48.9)%			
Interest income, net	\$	85	\$	228	\$	(143)	(62.7)%			

Interest expense in both the three and six months ended June 27, 2014 and June 28, 2013 primarily relates to interest on the debt assumed in connection with the acquisition of Network Equipment Technologies, Inc. ("NET") Interest income consists of interest earned on our cash equivalents, marketable debt securities and long-term investments. The decrease in interest income, net, in the current year periods compared to the prior year periods is attributable to a lower average portfolio yield on lower amounts available to invest in the current year.

Other Income (Expense), Net. We recorded \$2.25 million of income in the three months ended March 28, 2014 related to the settlement of a litigation matter in which we recovered a portion of our losses related to the impairment of certain prepaid royalties which we had written off in fiscal 2012. This amount is included in Other income (expense), net, for the six months ended June 27, 2014.

Income Taxes. We recorded provisions for income taxes of \$1.3 million in the six months ended June 27, 2014 and \$0.7 million in the six months ended June 28, 2013. These amounts reflect our estimates of the effective rates expected to be applicable for the respective full fiscal years, adjusted for any discrete events, which are recorded in the period that they occur. These estimates are reevaluated each quarter based on our estimated tax rate for the full fiscal year. The estimated amounts recorded do not include any benefit for our domestic losses, as we have concluded that a valuation allowance on any domestic benefit is required.

In September 2013, the U.S. Department of the Treasury and the Internal Revenue Service released final regulations relating to guidance on applying tax rules to amounts paid to acquire, produce or improve tangible personal property as well as rules for materials and supplies. The new rules are effective for us beginning in fiscal year 2015. We are currently assessing these rules and the impact they will have on our consolidated financial statements, if any.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial position, changes in financial position, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Liquidity and Capital Resources

Our consolidated statements of cash flows are summarized as follows (in thousands):

	 Six mon		
	June 27, 2014	June 28, 2013	Change
Net loss	\$ (9,450)	\$ (18,618)	\$ 9,168
Adjustments to reconcile net loss to cash flows provided by operating activities	21,398	18,868	2,530
Changes in operating assets and liabilities	8,306	28,679	(20,373)
Net cash provided by operating activities	\$ 20,254	\$ 28,929	\$ (8,675)
Net cash provided by (used in) investing activities	\$ 47,966	\$ (35,394)	\$ 83,360
Net cash (used in) provided by financing activities	\$ (79,395)	\$ 1,722	\$ (81,117)

Our cash, cash equivalents, marketable securities and long-term investments totaled \$149.5 million at June 27, 2014 and \$245.7 million at December 31, 2013. We had cash and short-term investments held by our foreign subsidiaries aggregating approximately \$10 million at June 27, 2014 and approximately \$5 million at December 31, 2013. We do not intend to repatriate these funds, and as such, they are not available to fund our domestic operations. If we were to repatriate the funds, they would likely be treated as income for U.S. tax purposes, fully offset by our net operating losses. We do not believe this has a material impact on our liquidity.

On June 27, 2014, we entered into a credit agreement (the "Credit Agreement") by and among us, as Borrower, Bank of America, N.A. ("Bank of America"), as Administrative Agent, Swing Line Lender and L/C Issuer, and the other lenders from time to time party thereto. The Credit Agreement provides for a revolving credit facility of up to \$40 million and provides that we may select the interest rates under the credit facility equal to (1) the Eurodollar Rate (which is defined as the rate per annum equal to the London Interbank Offered Rate ("LIBOR") plus 1.5% per annum) for a Eurodollar Rate Loan; and (2) the highest of (a) the Federal Funds Rate plus 1/2 of 1%, (b) the rate of interest in effect on the borrowing date as publicly announced from time to time by Bank of America as its prime rate, and (c) the monthly Eurodollar Rate plus 1%. We will pay a 0.15% commitment fee on the unused commitments available for borrowing. Borrowings under the Credit Agreement may be used for the general corporate purposes of the Company and its subsidiaries, including, without limitation, working capital, acquisitions, dividends and stock repurchases, to the extent permitted under the Credit Agreement. Our obligations under the Credit Agreement are guaranteed by Sonus International, Inc., Sonus Federal, Inc., NET and PT (collectively, together with us, the "Loan Parties") pursuant to a Master Continuing Guaranty and are secured by the assets of the Loan Parties pursuant to a Security and Pledge Agreement. The Credit Agreement contains affirmative, negative and financial covenants customary for financings of this type. The negative covenants include limitations on liens, indebtedness, fundamental changes, dispositions, restricted payments, investments, transactions with affiliates, certain restrictive agreements and compliance with sanctions laws and regulations. The amount of cash and cash equivalents of the Loan Parties, subject to certain exclusions, cannot be less than an aggregate amount of \$100 million at any time. The credit facility will become due on June 27, 2015, subject to acceleration upon certain specified events of default, including, without limitation, payment defaults, defaults in the performance of affirmative and negative covenants, the inaccuracy of representations or warranties, bankruptcy and insolvency-related defaults, defaults relating to judgments, an ERISA Event (as defined in the Credit Agreement), the failure to pay specified indebtedness and a change of control default. We did not have any amounts outstanding under the Credit Agreement at June 27, 2014.

On July 29, 2013, we announced that our Board of Directors had authorized a stock buyback program to repurchase up to \$100 million of our common stock from time to time on the open market or in privately negotiated transactions. The stock buyback program is being funded using our working capital. During the six months ended June 27, 2014, we repurchased and retired 2.3 million shares under our stock buyback program for approximately \$8.2 million in the aggregate, including transaction fees. This amount is included in financing activities in our condensed consolidated statement of cash flows for the six months ended June 27, 2014.

On March 20, 2014, we announced the commencement of an underwritten public offering of 37.5 million shares of our common stock on behalf of Galahad Securities Limited and its affiliated entities (collectively, the "Legatum Group"). The underwriter of the offering was granted a 30-day option to purchase up to 5.625 million additional shares from the Legatum Group. The Legatum Group received all the proceeds from the underwritten offering; no shares in the underwritten offering were sold by us or any of our officers or directors. In addition, we purchased 21.5 million shares from the underwriter for

\$75.3 million in the aggregate, including \$0.3 million of transaction fees. We funded the share repurchase with cash on hand. The repurchased shares were retired upon completion of the transaction.

Our operating activities provided \$20.3 million of cash in the six months ended June 27, 2014 and \$28.9 million of cash in the six months ended June 28, 2013.

Cash provided by operating activities in the six months ended June 27, 2014 was primarily the result of lower accounts receivable, inventories and other operating assets, partially offset by decreases in accrued expenses and other long-term liabilities, deferred revenue and accounts payable. The decrease in accounts receivable primarily reflects our continued focus on cash collections. Our continued focus on maintaining appropriate inventory levels was the primary contributor to the decrease in inventory. The decrease in other operating assets was primarily the result of lower prepaid expenses. The decrease in accrued expenses and other long-term liabilities was primarily related to employee compensation and related costs, including payments in connection with our Company-wide incentive bonus program, as well as restructuring payments. Our net loss, adjusted for non-cash items such as depreciation, amortization, impairment charges and stock-based compensation, provided \$11.9 million of cash.

Cash provided by operating activities in the six months ended June 28, 2013 was primarily the result of lower accounts receivable, other operating assets and inventory and higher deferred revenue. These amounts were partially offset by lower accounts payable and accrued expenses and other long-term liabilities. The decrease in accounts receivable primarily reflects our focus on cash collections and the decrease in other operating assets was primarily related to lower prepaid expenses. Our focus on maintaining appropriate inventory levels was the primary contributor to the decrease in inventory. The decrease in accrued expenses and other long-term liabilities was primarily related to employee compensation and related costs, including payments in connection with our Company-wide incentive bonus program, as well as lower taxes payable amounts, partially offset by an increase in accrued restructuring. Our net loss, adjusted for non-cash items such as depreciation, amortization and stock-based compensation, used \$0.3 million of cash.

Our investing activities provided \$48.0 million of cash in the six months ended June 27, 2014, comprised of \$86.2 million of aggregate maturities and sales of marketable securities and \$2.0 million of cash received in connection with our June 20, 2014 divestiture of the MPS business. These amounts were partially offset by \$34.0 million of cash paid, net of cash acquired, for the acquisition of PT on February 19, 2014 and \$6.3 million of investments in property and equipment.

Our investing activities used \$35.4 million of cash in the six months ended June 28, 2013, comprised of \$32.4 million of net maturities of marketable securities and \$3.0 million of investments in property and equipment.

Our financing activities used \$79.4 million of cash in the six months ended June 27, 2014, comprised of \$83.5 million, including transaction fees, for the repurchase of common stock, comprised of \$75.3 million to repurchase stock in connection with the Legatum Group public offering described above and \$8.2 million to repurchase stock under our stock buyback program, \$1.6 million used to pay withholding obligations related to the net share settlement of restricted stock awards upon vesting and \$44,000 for payments on our capital leases for office equipment. These amounts were partially offset by \$4.5 million of proceeds from the exercise of stock options and \$1.2 million of proceeds from the sale of our common stock in connection with our Amended and Restated 2000 Employee Stock Purchase Plan, as amended ("ESPP").

Our financing activities provided \$1.7 million of cash in the six months ended June 28, 2013, comprised of \$0.9 million of proceeds from the sale of our common stock in connection with our ESPP and \$1.3 million of proceeds from the exercise of stock options. These amounts were partially offset by \$0.4 million of cash used to pay withholding obligations related to the net share settlement of restricted stock awards upon vesting and \$62,000 for payments on our capital leases for office equipment.

Based on our current expectations, we believe our current cash, cash equivalents, marketable debt securities and long-term investments will be sufficient to meet our anticipated cash needs for working capital and capital expenditures for at least twelve months, including any future stock repurchases under the aforementioned stock buyback program. It is difficult to predict future liquidity requirements with certainty. The rate at which we will consume cash will be dependent on the cash needs of future operations, including changes in working capital, which will, in turn, be directly affected by the levels of demand for our products, the timing and rate of expansion of our business, the resources we devote to developing our products and any litigation settlements. We anticipate devoting substantial capital resources to continue our research and development efforts, to maintain our sales, support and marketing, to improve our controls environment, for other general corporate activities and to vigorously defend against existing and potential litigation. See Note 16 to our condensed consolidated financial statements for a description of our contingencies.

Recent Accounting Pronouncements

On June 19, 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-12, *Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period (a consensus of the FASB Emerging Issues Task Force)* ("ASU 2014-12"). ASU 2014-12 which clarifies that entities should treat performance targets that can be met after the requisite service period of a share-based payment award as performance conditions that affect vesting. Therefore, an entity would not record compensation expense (measured as of the grant date without taking into account the effect of the performance target) related to an award for which transfer to the employee is contingent on the entity's satisfaction of a performance target until it becomes probable that the performance target will be met. ASU 2014-12 does not contain any new disclosure requirements. ASU 2014-12 is effective for us on January 1, 2015. We do not expect the adoption of ASU 2014-12 to have a material impact on our condensed consolidated financial statements.

On May 28, 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09") its final standard on revenue from contracts with customers. ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the revenue model to contracts within its scope, an entity identifies the contract(s) with a customer, identifies the performance obligations in the contract and recognizes revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 applies to all contracts with customers that are within the scope of other topics in the ASC. Certain of ASU 2014-09's provisions also apply to transfers of nonfinancial assets, including in-substance nonfinancial assets that are not an output of an entity's ordinary activities (i.e., property, plant and equipment; real estate; or intangible assets). Existing accounting guidance applicable to these transfers has been amended or superseded. ASU 2014-09 also requires significantly expanded disclosures about revenue recognition. ASU 2014-09 is effective for us on January 1, 2017. We are currently assessing the potential impact of the adoption of ASU 2014-09 on our condensed consolidated financial statements.

On April 10, 2014, the FASB issued ASU 2014-08, *Reporting Discontinued Operation sand Disclosures of Disposals of Components of an Entity* ("ASU 2014-08"), which amends the definition of discontinued operations in ASC 205-20 and requires entities to provide additional disclosures about discontinued operations as well as disposal transactions that do not meet the discontinued operations criteria. The new guidance eliminates the previous criteria that the operations and cash flows of the component that have been (or will be) eliminated from the ongoing operations of the entity as a result of the disposal transaction. The new guidance also eliminates the previous criteria that the entity will not have any significant continuing involvement in the operations of the component after the disposal transaction. Instead, ASU 2014-08 requires discontinued operations treatment for disposals of a component or group of components that represents a strategic shift that has or will have a major impact on an entity's operations or financial results. ASU 2014-08 requires entities to reclassify assets and liabilities of a discontinued operation for all comparative periods presented in the statement of financial position. In addition, ASU 2014-08 requires that an entity disclose in its statement of cash flows, in all periods presented, either: (1) operating and investing cash flows or (2) depreciation and amortization, capital expenditures and significant operating and investing non-cash items related to the discontinued cooperation. ASU 2014-08 is effective prospectively for all disposals (except disposals classified as held for sale before the adoption date) or components initially classified as held for sale in periods beginning on or after December 15, 2014. We do not expect the adoption of ASU 2014-08 to have a material impact on our condensed consolidated financial statements.

On July 18, 2013, the FASB issued ASU 2013-11, *Presentation of a Liability for an Unrecognized Tax Benefit When a Net Operating Loss Carryforward or Tax Credit Carryforward Exists* ("ASU 2013-11"), which provides guidance on financial statement presentation of an unrecognized tax benefit when a net operating loss ("NOL") carryforward, a similar tax loss or a tax credit carryforward exists. The FASB's objective in issuing ASU 2013-11 was to eliminate diversity in practice resulting from a lack of guidance on this topic in current GAAP. ASU 2013-11 requires that an entity present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, in the financial statements as a reduction to a deferred tax asset for an NOL carryforward, a similar tax loss or a tax credit unless certain conditions exist. ASU 2013-11 was effective for us beginning January 1, 2014. The adoption of ASU 2013-11 did not have an impact on our consolidated financial statements, as we already applied the methodology prescribed by ASU 2013-11.

On March 4, 2013, the FASB issued ASU 2013-05, Foreign Currency Matters (Topic 830) - Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity ("ASU 2013-05"), which indicates that the entire amount of a cumulative translation adjustment ("CTA") related to an entity's investment in a foreign entity should be released when there has been either: (a) a sale of a subsidiary or group of net assets within a foreign entity and the sale represents the substantially complete liquidation of the investment in a foreign entity; (b) the loss of a controlling financial interest in an investment in a foreign entity (i.e., the foreign entity is deconsolidated); or (c) the step acquisition of a foreign entity (i.e., when the accounting for an entity has changed from applying the equity method for an investment in a foreign entity to consolidating the foreign entity). ASU 2013-05 does not change the requirement to release a pro rata portion of the CTA of the foreign entity into earnings for a partial sale of an equity method investment in a foreign entity. ASU 2013-05 became effective for us on January 1, 2014. The adoption of ASU 2013-05 did not have a material impact on our consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to a variety of market risks, including changes in interest rates affecting the return on our investments and foreign currency fluctuations. We do not believe that a hypothetical 10% adverse movement in interest rates and foreign currency exchange rates would have a materially different impact from what was disclosed in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Our management, with the participation of our principal executive officer and principal financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 27, 2014.

Changes in Internal Control over Financial Reporting. There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter ended June 27, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

We are often a party to disputes and legal proceedings that we consider routine and incidental to our business. Management does not expect the results of any of these actions to have a material effect on our business or consolidated financial statements.

Item 1A. Risk Factors

Investing in our common stock involves a high degree of risk. You should carefully consider the risks described below before buying our common stock. If any of the following risks actually occurs, our business, financial condition, results of operations and cash flows could be materially adversely affected, the trading price of our common stock could decline materially and you could lose all or part of your investment. There have been no material changes in our assessment of our risk factors from those set forth in our Quarterly Report on Form 10-Q for the fiscal quarter ended March 28, 2014. For convenience, all of our risk factors are included below.

Our quarterly revenue and operating results are unpredictable and may fluctuate significantly from quarter to quarter, which could adversely affect our business, consolidated financial statements and the trading price of our common stock.

Our revenues and operating results may vary significantly from quarter to quarter due to a number of factors, many of which are outside of our control and any of which may cause our stock price to fluctuate. The primary factors that may affect our revenues and operating results include, but are not limited to, the following:

- consolidation within the telecommunications industry, including acquisitions of or by our customers;
- general economic conditions in our markets, both domestic and international, as well as the level of discretionary IT spending;
- competitive conditions in our markets, including the effects of new entrants, consolidation, technological innovation and substantial price discounting;
- fluctuation in demand for our voice infrastructure products and services, and the timing and size of customer orders;
- fluctuations in foreign exchange rates;
- cancellation or deferral of existing customer orders or the renegotiation of existing contractual commitments;
- mix of product configurations sold;
- length and variability of the sales cycle for our products;
- application of complex revenue recognition accounting rules to our customer arrangements;
- timing of revenue recognition;
- changes in our pricing policies, the pricing policies of our competitors and the prices of the components of our products;
- market acceptance of new products, product enhancements and services that we offer;
- the quality and level of our execution of our business strategy and operating plan, and the effectiveness of our sales and marketing programs;

- · new product announcements, introductions and enhancements by us or our competitors, which could result in deferrals of customer orders;
- our ability to develop, introduce, ship and successfully deliver new products and product enhancements that meet customer requirements in a timely
 manner:
- our reliance on contract manufacturers for the production and shipment of our hardware products;
- our or our contract manufacturers' ability to obtain sufficient supplies of sole or limited source components or materials;
- our ability to attain and maintain production volumes and quality levels for our products;
- variability and unpredictability in the rate of growth in the markets in which we compete;
- · costs related to acquisitions; and
- corporate restructurings.

Equipment purchases by communications service providers and enterprises have become increasingly unpredictable given the current economic conditions. Additionally, as with other telecommunications product suppliers, we typically recognize a portion of our revenue in a given quarter from sales booked and shipped in the last weeks of that quarter. As a result, delays in customer orders may result in delays in shipments and recognition of revenue beyond the end of a given quarter. Additionally, it can be difficult for us to predict the timing of receipt of major customer orders, and we are unable to control timing decisions made by our customers. As a result, our quarterly operating results are difficult to predict even in the near term and a delay in an anticipated sale past the end of a particular quarter may negatively impact our results of operations for that quarter, or in some cases, that year. Therefore, we believe that quarter-to-quarter comparisons of our operating results are not a good indication of our future performance. If our revenue or operating results fall below the expectations of investors or securities analysts or below any guidance we may provide to the market, the price of our common stock could decline substantially. Such a stock price decline could also occur when we have met our publicly stated revenue and/or earnings guidance.

A significant portion of our operating expenses is fixed in the short term. If revenues for a particular quarter are below expectations, we may not be able to reduce costs and expenses proportionally for that quarter. Any such revenue shortfall would, therefore, have a significant effect on our operating results for that quarter.

We have incurred net losses and may incur additional net losses.

We incurred net losses in the first two quarters of 2014, as well as in 2013, 2012 and 2011. We may incur additional net losses in future quarters and years. Our revenues may not grow and we may never generate sufficient revenues to sustain profitability.

We will not be successful if we do not grow our customer base, especially since our revenue has historically been generated from a limited number of customers and the per-order revenue from orders placed by the majority of our new customers is generally lower than the per-order revenue generated from our historical sales. Additionally, if we are unable to generate recurring business from our existing customers, our consolidated financial statements could be materially and adversely affected.

Prior to our acquisition of Network Equipment Technologies, Inc. ("NET") on August 24, 2012, we had shipped our products to a limited number of customers. Since the acquisition of NET, the number of customers to whom we have shipped our products has increased significantly. However, due to the nature of certain of our new product offerings, the per-order revenue from orders placed by the majority of our new customers is generally lower than the per-order revenue generated from our historical sales.

Our future success will depend on our ability to attract additional customers beyond our current customer base. In 2013 and 2012, one customer, AT&T, contributed more than 10% of our revenue, representing approximately 15% of our revenue in 2013 and 20% of our revenue in 2012. In 2011, two customers, Bahamas Telecommunications Company Ltd. and AT&T, each contributed more than 10% of our revenue, representing approximately 26% of our revenue in the aggregate. Factors that may affect our ability to grow our customer base include the following:

- economic conditions that discourage potential new customers from making the capital investments required to adopt new technologies;
- deterioration in the general financial condition of service providers and enterprises, or their ability to raise capital or access lending sources;
- · new product introductions by our competitors; and
- the continued development of our channel program.

If we are unable to expand our customer base, we will be forced to rely on generating recurring revenue from existing customers, which may not be successful. We expect to derive an increasing percentage of our revenue from engagements with our value-added resellers ("VAR") and global system integration partners; however, in the foreseeable future, the majority of our revenue will continue to depend on sales of our products to a limited number of existing customers or sales to customers with lower per-order revenue than those generated from our historical sales. Factors that may affect our ability to generate recurring revenues from our existing customers include the following:

- customer willingness to implement our new voice infrastructure products;
- acquisitions of or by our customers;
- delays or difficulties that we may incur in completing the development and introduction of our planned products or product enhancements;
- · failure of our products to perform as expected; and
- difficulties we may incur in meeting customers' delivery requirements.

The loss of any significant customer or any substantial reduction in purchase orders from these customers could materially and adversely affect our consolidated financial statements.

We continue to enhance our sales strategy, which we expect will include more significant engagements with value-added resellers and global system integration partners to resell our products. Disruptions to, or our failure to effectively develop and manage, these partners and the processes and procedures that support them could adversely affect our ability to generate revenues from the sale of our products. If we do not have adequate personnel, experience and resources to manage the relationships with these partners and to fulfill our responsibilities under such arrangements, such shortcomings could lead to the decrease of the sales of our products and our operating results could suffer.

We continue to enhance our sales strategy, which we expect will include more significant engagements with VAR channel partners and global system integrators to resell our products. Our future success is dependent upon establishing and maintaining successful relationships with a variety of value-added distribution, VAR and systems integration partners. We may also need to pursue strategic partnerships with vendors who have broader technology or product offerings in order to compete with end-to-end solution providers. In addition, many of the enterprise markets we are pursuing require a broad network of resale partners in order to achieve effective distribution.

Many of our distribution and channel partners sell competitive products and the loss of, or reduction in sales by, these partners could materially reduce our revenues. Our sales through channel partners typically involve the use of our products as components of a larger solution being implemented by the systems integrator. In these instances, the purchase and sale of our products are dependent on the channel partner, who typically controls the timing, prioritization and implementation of the project. Project delays, changes in priority or solution re-design decisions by the systems integrator can adversely affect our product sales. If we fail to maintain relationships with our distribution, VAR and systems integration partners; fail to develop new relationships with other partners in new markets; fail to manage, train or provide incentives to our existing partners effectively; or if these partners are not successful in their sales efforts, sales of our products may decrease and our operating results could suffer. Moreover, if we do not have adequate personnel, experience and resource to manage the relationships with our partners and to fulfill our responsibilities under such arrangements, any shortcomings could have a material adverse impact on our business and consolidated financial statements.

In addition, we recognize some of our revenue based on a sell-through model using information provided by our partners. If those partners provide us with inaccurate or untimely information, the amount or timing of our revenues could be adversely affected. We may also experience financial failure of our partners, which could result in our inability to collect accounts receivable in full.

As the telecommunications industry and the requirements of our current and potential customers evolve, we are redirecting certain of our resources to more readily respond to the changing environment through the research and development of innovative new products and the improvement of existing products. If our strategic plan is not aligned with the direction our customers take as they invest in the evolution of their networks, customers may not buy our products or use our services.

Success in our industry requires large investments in technology and creates exposure to rapid technological and market changes. We spend a significant amount of time, money and resources both developing new technology, products and solutions and acquiring new businesses, such as NET in August 2012 and Performance Technologies, Incorporated ("PT") in February 2014. Our strategic plan includes a significant shift in our investments from mature technologies that previously generated significant revenue for us toward certain next-generation technologies as well as working with more channel partners to sell our products. In order for us to be successful, our technologies, products and solutions must be accepted by relevant

standardization bodies and by the industry as a whole. Our choices of specific technologies to pursue, and those to de-emphasize, may prove to be inconsistent with our customers' investment spending. Our success also depends upon our ability to integrate new and acquired products and services, as well as our ability to enhance our existing products and services. Moreover, if we invest in the development of technologies, products and solutions that do not function as expected, are not adopted by the industry, are not ready in time, are not accepted by our customers as quickly as anticipated or are not successful in the marketplace, our sales and earnings may suffer and, as a result, our stock price could decline. As technology advances, we may not be able to respond quickly or effectively to developments in the market for our products, or new industry standards may emerge and could render our existing or future products obsolete. If our products become technologically obsolete or if we are unable to develop successor products that are accepted by our customers, we may be unable to sell our products in the marketplace and face declines in sales. We may also experience difficulties with software development, hardware design, manufacturing or marketing that could delay or prevent our development, introduction or marketing of new products and enhancements.

In 2012, the macro-environment for our media gateway trunking business faced significant declining revenues that happened faster than we were anticipating. In 2013, we continued to experience significant declines in customer spending in our media gateway trunking business. Even though we continue to transform our company from a media gateway trunking business to an SBC and DSC business, we remain dependent upon our voice infrastructure products, and our revenues will continue to depend upon their commercial success for the foreseeable future. If the market for these products continues to significantly decline and if our SBC and DSC sales do not accelerate as quickly as we forecast, our operating results could suffer.

While we continue to transform our company from a media gateway trunking business to an SBC and Diameter Signaling Controller ("DSC") business, our current revenues still depend upon the commercial success of our TDM-to-IP and our all-IP voice infrastructure products and solutions, and we believe this will remain true for the foreseeable future. Product revenue from sales of our trunking and communications applications products was \$69.8 million for the year ended December 31, 2013, \$85.7 million for the year ended December 31, 2012 and \$116.5 million for the year ended December 31, 2011, which represented decreases of 18.5% in year 2013 compared to 2012 and 26.4% in 2012 compared to 2011. If the market for these products continues to significantly decline and if our SBC and DSC sales do not accelerate as quickly as we forecast, our operating results could suffer.

Restructuring activities could adversely affect our ability to execute our business strategy.

In August 2012, we announced that we were implementing a restructuring initiative to streamline operations and reduce our operating costs. In connection with this action, we recorded restructuring expense of \$13.1 million in the aggregate in 2013 and 2012, comprised of \$4.4 million for the consolidation of certain facilities, \$8.4 million for severance and related costs and \$0.3 million for the write-off of assets associated with the headcount reduction and facilities consolidations. This restructuring and any future restructurings, should it become necessary for us to continue to restructure our business due to worldwide market conditions or other factors that reduce the demand for our products and services, could adversely affect our ability to execute our business strategy in a number of ways, including through:

- loss of key employees;
- diversion of management's attention from normal daily operations of the business;
- diminished ability to respond to customer requirements related to both products and services;
- decrease in cash and profits related to severance payments and facility termination costs;
- disruption of our engineering and manufacturing processes, which could adversely affect our ability to introduce new products and to deliver products both on a timely basis and in accordance with the highest quality standards; and/or
- reduced ability to execute effectively internal administrative processes, including the implementation of key information technology programs.

If we fail to realize the anticipated benefits from our acquisition of PT on a timely basis, or at all, our business and financial condition may be adversely affected.

We may fail to realize the anticipated benefits from our acquisition of PT on a timely basis, or at all, for a variety of reasons, including the following:

- problems or delays in assimilating or transitioning to Sonus the acquired operations, systems, processes, controls, technologies, products or personnel;
- loss of acquired customer accounts;
- unanticipated costs associated with the acquisition;

- failure to identify in the due diligence process or assess the magnitude of certain liabilities we assumed in the acquisition, which could result in unexpected litigation or regulatory exposure, unfavorable accounting treatment, unexpected increases in taxes due, significant issues with product quality or development or other adverse effects on our business or consolidated financial statements;
- multiple or overlapping product lines as a result of the acquisition that are offered, priced and supported differently, which could cause customer confusion and delays;
- higher than anticipated costs in continuing support and development of acquired products;
- diversion of management's attention from our core business and the challenges of managing larger and more widespread operations from the acquisition;
- adverse effects on existing business relationships of Sonus or PT with respective suppliers, licensors, contract manufacturers, customers, distributors, resellers and industry experts;
- significant impairment, exit and/or restructuring charges if the products or technologies acquired in the acquisition do not meet our sales expectations or are unsuccessful;
- insufficient revenue to offset increased expenses associated with the acquisition;
- risks associated with entering markets in which we have no or limited prior experience;
- · potential loss of PT's or our own employees; and/or
- failure to properly integrate internal controls and financial systems of the combined companies.

If we are not able to successfully manage these issues, the anticipated benefits and efficiencies of the PT acquisition may not be realized fully or at all, or may take longer to realize than expected, and our ability to compete, our revenue and gross margins and our results of operations may be adversely affected.

The acquisition of PT may result in restructuring charges that could adversely affect the financial results of the combined company.

The financial results of Sonus and PT as a combined company may be adversely affected by cash expenses and non-cash accounting charges incurred in connection with the combination. The amount and timing of these possible charges are not yet known. The price of our common stock could decline to the extent the combined company's financial results are materially affected by these charges.

Any future investments or acquisitions we make could be difficult to integrate, disrupt our business, dilute shareholder value and seriously harm our financial condition.

We are not currently a party to any material pending acquisition agreements. However, we may acquire additional businesses, products or technologies in the future. Acquisitions are inherently risky and no assurance can be given that our future acquisitions will be successful or will not materially and adversely affect our business, operating results or financial condition. We expect to continue to review opportunities to acquire other businesses or technologies that would add to our existing product line, complement and enhance our current products, expand the breadth of our markets, enhance our technical capabilities or otherwise offer growth opportunities. If we make further acquisitions, we could, among other things:

- issue stock that would dilute existing stockholders' percentage ownership;
- incur debt or assume liabilities;
- reduce significantly our cash and investments;
- incur significant impairment charges related to the write-off of goodwill and intangible assets;
- incur significant amortization expenses related to intangible assets; and/or
- incur large and immediate write-offs for in-process research and development and stock-based compensation.

Mergers and acquisitions are inherently risky and subject to many factors outside of our control, and we cannot be certain that we would be successful in overcoming problems in connection with our past or future acquisitions. Our inability to do so could significantly harm our business, revenues, and results of operations.

Worldwide efforts to contain capital spending, general uncertainty as to continued economic growth during the current post-recessionary global economy, the possibility of another recession and a continued weakened global economy could have a material adverse effect on us.

One factor that significantly affects our operating results is the impact of economic conditions on the willingness of our current and potential customers to make capital investments. Given the general uncertainty as to continued economic growth during the current post-recessionary global economy, we believe that customers continue to be cautious about sustained economic growth and have tried to maintain or improve profitability through cost control and constrained capital spending, which places

additional pressure on IT departments to demonstrate acceptable return on investment. Some of our current or prospective customers may cancel or delay spending on the development or roll-out of capital and technology projects with us due to the continuing economic uncertainty and, consequently, our results of operations may be adversely affected. In addition, the current uncertain worldwide economic and political environments make it increasingly difficult for us, our customers and our suppliers to accurately forecast future product demand, which could result in an inability to satisfy demand for our products and a loss of market share. Our revenues are likely to decline in such circumstances and our profit margins could erode, or we could incur significant losses.

Moreover, economic conditions worldwide may continue to contribute to slowdowns in the communications and networking industries, as well as to specific segments and markets in which we operate, resulting in:

- reduced demand for our products as a result of our customers choosing to refrain from building capital intensive networks;
- increased price competition for our products, not only from our competitors, but also as a consequence of customers disposing of unutilized products;
- · risk of excess and obsolete inventories;
- · excess facilities and manufacturing capacity; and/or
- higher overhead costs as a percentage of revenue and higher interest expense.

Continuing turmoil in the geopolitical environment in many parts of the world, including terrorist activities and military actions, particularly the continuing tension in Eastern Europe, Southeast Asia, the Middle East and Africa, as well as political and economic issues in Europe continue to put pressure on global economic conditions. Our operating results and our ability to expand into other international markets may also be affected by changing economic conditions particularly germane to that sector or to particular customer markets within that sector.

If we fail to compete successfully against telecommunications equipment and networking companies, our ability to increase our revenues and achieve profitability will be impaired.

Competition in the telecommunications market is intense. This market has historically been dominated by large incumbent telecommunications equipment companies, such as Ericsson LM Telephone Company and Huawei Technologies Co. Ltd., both of which are our direct competitors. We also face competition from other telecommunications and networking companies, including AudioCodes Ltd., Cisco Systems, Inc., GENBAND Inc., Metaswitch and Oracle Corporation, all of which design competing products. These or other competitors may also merge, intensifying competition. Additional competitors with significant financial resources may enter our markets and further intensify competition.

Many of our current and potential competitors have significantly greater selling and marketing, technical, manufacturing, financial and other resources than we have. Further, some of our competitors sell significant amounts of other products to our current and prospective customers and have the ability to offer lower prices to win business. Our competitors' broad product portfolios, coupled with already existing relationships, may cause our customers to buy our competitors' products or harm our ability to attract new customers.

To compete effectively, we must deliver innovative products that:

- provide extremely high reliability and quality;
- deploy and scale easily and efficiently;
- · interoperate with existing network infrastructures and multivendor solutions;
- provide effective network management;
- are accompanied by comprehensive customer support and professional services;
- · provide a cost-effective and space-efficient solution for service providers; and
- · meet price competition from low cost equipment providers.

If we are unable to compete successfully against our current and future competitors, we could experience price reductions, order cancellations, loss of customers and revenues, and our operating results could be adversely affected.

If we do not anticipate and meet specific customer requirements or if our products do not interoperate with our customers' existing networks, we may not retain current customers or attract new customers.

To achieve market acceptance for our products, we must effectively anticipate, and adapt in a timely manner to, customer requirements and offer products and services that meet changing customer demands. Prospective customers may require

product features and capabilities that our current products do not have. The introduction of new or enhanced products also requires that we carefully manage the transition from older products in order to minimize disruption in customer ordering patterns and ensure that adequate supplies of new products can be delivered to meet anticipated customer demand. If we fail to develop products and offer services that satisfy customer requirements or if we fail to effectively manage the transition from older products, our ability to create or increase demand for our products would be seriously harmed and we may lose current and prospective customers.

Many of our customers will require that our products be designed to interface with their existing networks, each of which may have different specifications. Issues caused by an unanticipated lack of interoperability may result in significant warranty, support and repair costs, divert the attention of our engineering personnel from our hardware and software development efforts and cause significant customer relations problems. If our products do not interoperate with those of our customers' networks, installations could be delayed or orders for our products could be canceled, which would seriously harm our gross margins and result in loss of revenues or customers. Additionally, our customers may decide to devote a significant portion of their budgets to evolving technology as they consider national or worldwide build-outs. Therefore, if the demand for our products is not strong and if our target customers do not adopt, purchase and successfully deploy our current or planned products, our revenues will not grow.

Our large customers have substantial negotiating leverage, and they may require that we agree to terms and conditions that may have an adverse effect on our business.

Large communications service providers have substantial purchasing power and leverage in negotiating contractual arrangements with us. These customers may, among other things, require us to develop additional features, require penalties for failure to deliver such features, require us to partner with a certain reseller before purchasing our products and/or seek discounted product and/or service pricing. As we sell more products to this class of customer, we may be required to agree to terms and conditions that are less beneficial to us, which may affect the timing of revenue recognition, amount of deferred revenues or product and service margins and may adversely affect our financial position and cash flows in certain reporting periods.

Our stock price has been and may continue to be volatile.

The market for technology stocks has been, and will likely continue to be, volatile. The following factors could cause the market price of our common stock to fluctuate significantly:

- addition or loss of any major customer;
- continued significant declines in customer spending in the media gateway trunking business;
- consolidation and competition in the telecommunications industry;
- changes in the financial condition or anticipated capital expenditure purchases of any existing or potential major customer;
- economic conditions for the telecommunications, networking and related industries;
- quarterly variations in our bookings, revenues and operating results;
- changes in financial estimates by securities analysts;
- speculation in the press or investment community;
- announcements by us or our competitors of significant contracts, new products or acquisitions, distribution partnerships, joint ventures or capital commitments:
- activism by any single large stockholder or combination of stockholders;
- sales of common stock or other securities by us or by our stockholders in the future;
- · securities and other litigation;
- repurchases under our stock buyback program;
- announcement of a stock split, reverse stock split, stock dividend or similar event; and/or
- emergence or adoption of new technologies or industry standards.

Our business could be jeopardized if we are unable to protect our intellectual property; additionally, in some jurisdictions, our rights may not be as strong as we currently enjoy in the United States.

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy or otherwise obtain and use our products or technology. Monitoring unauthorized use of our products is difficult and we cannot be certain that the steps we have taken will prevent unauthorized use of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States. The legal systems of many foreign countries do

not protect or honor intellectual property rights to the same extent as the legal system of the United States. It may be very difficult, time-consuming and costly for us to attempt to enforce our intellectual property rights in these jurisdictions. If competitors are able to use our technology, our ability to compete effectively could be harmed.

Claims that our current or future products infringe or misappropriate the proprietary rights of others could adversely affect our ability to sell those products and cause us to incur additional costs.

Substantial litigation over intellectual property rights exists in the telecommunications industry. We expect that we could be increasingly subject to third-party infringement claims as our revenue increases, the number of competitors grows and the functionality of products and technology in different industry segments overlaps. Third parties may currently have, or may eventually be issued, patents on which our current or future products or technologies may infringe. For example, there has been an increase in the industry of third-party infringement claims brought by Non-Practicing Entities, also known as patent trolls.

In addition, we and our customers have received inquiries from intellectual property owners and may become subject to claims that we or our customers infringe the intellectual property rights of third parties. Any parties asserting that our products infringe upon their proprietary rights could force us to license their patents for substantial royalty payments or to defend ourselves and possibly our customers or contract manufacturers in litigation. These claims and any resulting licensing arrangement or lawsuit, if successful, could subject us to significant royalty payments or liability for damages and invalidation of our proprietary rights. Any potential intellectual property litigation also could force us to do one or more of the following:

- stop selling, incorporating or using our products that use the challenged intellectual property;
- obtain from the owner of the infringed intellectual property right a license to sell or use the relevant technology, which license may not be available at acceptable prices, on acceptable terms, or at all; or
- · redesign those products that use any allegedly infringing technology.

Patent litigation, regardless of its outcome, will likely result in the expenditure of significant financial resources and the diversion of management's time and resources. In addition, patent litigation may cause negative publicity, adversely impact prospective customers, cause product shipment delays, prohibit us from manufacturing, marketing or selling our current or future products, require us to develop non-infringing technology, make substantial payments to third parties or enter into royalty or license agreements, which may not be available on acceptable terms or at all. If a successful claim of infringement were made against us in a particular patent litigation and we could not develop non-infringing technology or license the infringed or similar technology on a timely and cost-effective basis, our revenue may decrease substantially and we could be exposed to significant liability. A court could enter orders that temporarily, preliminarily or permanently enjoin us or our customers from making, using, selling, offering to sell or importing our current or future products, or could enter an order mandating that we undertake certain remedial activities. Although historically our costs to defend lawsuits relating to indemnification provisions in our product agreements have been insignificant, the costs may be significant in future periods.

We may face risks related to litigation that could result in significant legal expenses and settlement or damage awards.

From time to time, we are subject to claims and litigation regarding intellectual property rights or other claims, which could seriously harm our business and require us to incur significant costs. In the past, we have been named as a defendant in securities class action and derivative lawsuits. We are generally obliged, to the extent permitted by law, to indemnify our current and former directors and officers who are named as defendants in these lawsuits. Defending against litigation may require significant attention and resources of management. Regardless of the outcome, such litigation could result in significant legal expenses.

We may also be subject to employment claims in connection with employee terminations. In addition, companies in our industry whose employees accept positions with us may claim that we have engaged in unfair hiring practices. These claims may result in material litigation. We could incur substantial costs defending ourselves or our employees against those claims, regardless of their merits. In addition, defending ourselves from those types of claims could divert our management's attention from our operations. The cost of employment claims may also increase as a result of our increasing international expansion.

If we are a party to material litigation and if the defenses we claim are ultimately unsuccessful, or if we are unable to achieve a favorable settlement, we could be liable for large damage awards that could have a material adverse effect on our business and consolidated financial statements.

If in the future we do not have a sufficient number of shares available to issue to our employees, the limited number of shares we could issue may impact our ability to attract, retain and motivate key personnel.

We historically have used stock options and restricted stock as a significant component of our employee compensation program in order to align our employees' interests with the interests of our stockholders, encourage employee retention and provide competitive compensation packages. In 2007, our stockholders approved a stock incentive plan which includes a limited amount of shares to be granted under such plan. In 2010, our stockholders approved amendments to this plan to, among other things, increase the number of shares of our common stock that may be granted under this plan from 14,902,701 to 34,902,701. In June 2013, our stockholders approved an amendment to this plan to increase the number of shares of our common stock that may be granted under this plan by 21,000,000, from 34,902,701 to 55,902,701. Additionally, in connection with the acquisition of NET, we assumed NET's 2008 Stock Incentive Plan, which provides for the award of stock options, restricted stock, performance-based awards and stock appreciation rights to Sonus employees who were previously NET employees and Sonus employees hired after August 24, 2012, the NET acquisition date. In connection with the acquisition of PT, we assumed its Performance Technologies, Incorporated 2001 Stock Option Plan, Performance Technologies, Incorporated 2003 Omnibus Incentive Plan and 2012 Amended Performance Technologies, Incorporated Omnibus Incentive Plan (the "2012 Omnibus Plan"). PT's 2001 Stock Option Plan had expired for purposes of new options by its terms on May 31, 2011 but was assumed by us solely for the purpose of administering any outstanding options under this plan. Meanwhile, PT's 2003 Omnibus Incentive Plan was assumed by us solely for the purpose of administering any outstanding awards under such plan as of the PT closing. PT's 2012 Omnibus Incentive Plan provides for the award of stock options, restricted stock, stock appreciation rights and other stock-based awards to Sonus employees who were previously PT employees and Sonus employees hired

When the number of shares available for grant under our stock incentive plans becomes insufficient for our needs, it is not certain that our stockholders will approve an increase in the number of shares that we are authorized to issue under such plans. The limited number of shares available for use as equity incentives to employees may make it more difficult for us to attract, retain and motivate key personnel.

Actions that may be taken by significant stockholders may divert the time and attention of our Board of Directors and management from our business operations.

Campaigns by significant investors to effect changes at publicly-traded companies continue to be prevalent. There can be no assurance that one or more stockholders will not pursue actions to effect changes in our management and strategic direction, including through the solicitation of proxies from our stockholders. If a proxy contest were to be pursued by any stockholder, it could result in substantial expense to us, consume significant attention of our management and Board of Directors, and disrupt our business.

Delaware law, our charter documents and our stockholder rights plan contain provisions that could discourage or prevent a potential takeover, even if such a transaction would be beneficial to our stockholders.

Some provisions in our amended and restated certificate of incorporation, our amended and restated by-laws, as well as provisions of Delaware law, may discourage, delay or prevent a merger or acquisition that may be deemed undesirable by our Board of Directors but that a stockholder may consider favorable. These include provisions:

- authorizing the Board of Directors to issue shares of preferred stock;
- limiting the persons who may call special meetings of stockholders;
- prohibiting stockholder actions by written consent;
- permitting the Board of Directors to increase the size of the Board and to fill vacancies;
- providing indemnification to our directors and officers;
- controlling the procedures for conduct and scheduling of Board and stockholder meetings;
- requiring a super-majority vote of our stockholders to amend our amended and restated by-laws and certain provisions of our amended and restated certificate of incorporation; and
- establishing advance notice requirements for nominations for election to the Board of Directors or for proposing matters that can be acted on by stockholders at stockholder meetings.

These provisions, alone or together, could delay hostile takeovers or changes in control of us or our management.

As a Delaware corporation, we are also subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation law, which prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of substantially all of our outstanding common stock.

In addition, we adopted a limited duration stockholder rights plan on June 26, 2008, which was amended on June 10, 2011 and again on June 21, 2013 to extend the expiration date of such plan until June 26, 2015. The rights are not intended to prevent a takeover, and we believe these rights will help us in our negotiations with any potential acquirers. However, if the Board of Directors believes that a particular acquisition of us is undesirable, the rights may have the effect of rendering more difficult or discouraging that acquisition. The rights may substantially dilute the stock ownership of a person or group that attempts to acquire us (or a significant percentage of our outstanding capital stock) on terms, or in a manner, not approved by our Board of Directors, except pursuant to an offer conditioned upon redemption of the rights.

Any provision of our amended and restated certificate of incorporation or amended and restated by-laws, our stockholder rights plan or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock. Although we believe that our amended and restated certificate of incorporation and our amended and restated bylaws, provisions of Delaware law and our stockholder rights plan provide an opportunity for the Board of Directors to assure that our stockholders realize full value for their investment, they could have the effect of delaying or preventing a change of control that some stockholders may consider beneficial.

We are exposed to fluctuations in currency exchange rates that could negatively impact our financial results and cash flows.

Because a portion of our business is conducted outside the United States, we face exposure to adverse movements in foreign currency exchange rates. These exposures may change over time as business practices evolve, and they could have a material adverse impact on our financial results and cash flows. An increase in the value of the dollar could increase the real cost to our customers of our products in those markets outside the United States where we often sell in dollars, and a weakened dollar could increase the cost of local operating expenses and procurement of raw materials from sources outside the United States.

We may face risks associated with our international expansion that could impair our ability to grow our international revenues. If we fail to manage the operational and financial risks associated with our international operations, it could have a material adverse effect on our business and consolidated financial statements.

We have expanded, and expect to continue to expand, our operations in international and emerging markets. International operations are a significant part of our business, and such operations will continue to require significant management attention and financial resources to successfully develop direct and indirect international sales and support channels. In addition, our international operations are subject to other inherent risks, including:

- · reliance on channel partners;
- greater difficulty collecting accounts receivable and longer collection cycles;
- difficulties and costs of staffing and managing international operations;
- impacts of differing technical standards outside the United States;
- compliance with international trade, customs and export control regulations;
- reduced protection for intellectual property rights in some countries;
- foreign government regulations limiting or prohibiting potential sales or increasing the cost of doing business in such markets, including reversals or delays in the opening of foreign markets to new competitors or the introduction of new technologies;
- challenging pricing environments in highly competitive new markets;
- foreign currency exchange controls, restrictions on repatriation of cash and changes in currency exchange rates;
- · potentially adverse tax consequences; and
- political, social and economic instability, including as a result of the current fragility of global financial markets, health pandemics or epidemics and/or acts of war or terrorism.

Our international revenue, both as a percentage of total revenue and absolute dollars, may vary from one period to the next, and accordingly, current data may not be indicative of future periods. If we are unable to support our business operations in international and emerging markets, or their further expansion, while balancing the higher operational and financial risks associated with these markets, our business and consolidated financial statements could be harmed.

In addition, we may not be able to develop international market demand for our products, which could impair our ability to grow our revenues. In many international markets, long-standing relationships between potential customers and their local suppliers and protective regulations, including local content requirements and approvals, create barriers to entry. We have limited experience marketing, distributing and supporting our products in certain international locations and, to do so, we expect that we will need to develop versions of our products that comply with local standards. Moreover, difficulties in foreign

financial markets and economies and of foreign financial institutions, particularly in emerging markets, could adversely affect demand from customers in the affected countries.

We depend upon contract manufacturers and any disruption in these relationships may cause us to fail to meet the demands of our customers and damage our customer relationships. Additionally, in the event we elect to consolidate and/or change any of our manufacturers, qualifying a new contract manufacturer to commence commercial scale production or consolidating to a reduced number of contract manufacturers are expensive and time-consuming activities and could affect our business.

While we currently work with four contract manufacturers, we primarily rely upon one large global manufacturer to assemble our products according to our specifications and to fulfill orders on a timely basis. Reliance on a third-party manufacturer involves a number of risks, including a lack of control over the manufacturing process, inventory management and the potential absence or unavailability of adequate capacity. We do not have the internal manufacturing capabilities to meet our customers' demands. Any difficulties or failures to perform by our contract manufacturers could cause delays in customer product shipments or otherwise negatively affect our results of operations.

During 2013, we reduced from five contract manufacturers to three contract manufacturers without any supply disruption. With the acquisition of PT in February 2014, we have added one additional contract manufacturer such that we are currently working with four contract manufacturers. Additionally, we switched from one single-source manufacturer to another in 2009 as well as in 2011 without any supply disruptions during either of these transitions. However, any future changes to or consolidations of our current contract manufacturers could lead to material shortages or delays in the supply of our products. In the event we elect to continue to consolidate and/or change any of our manufacturers, qualifying a new contract manufacturer to commence commercial scale production or consolidating to a reduced number of contract manufacturers are expensive and time-consuming activities and could result in a significant interruption in the supply of our products. If a change in contract manufacturers results in delays in our fulfillment of customer orders or if a contract manufacturer fails to make timely delivery of orders, we may lose revenues and suffer damage to our customer relationships.

We and our contract manufacturers rely on single or limited sources for supply of some components of our products and if we fail to adequately predict our manufacturing requirements or if our supply of any of these components is disrupted, we will be unable to ship our products.

We and our contract manufacturers currently purchase several key components of our products, including commercial digital signal processors, from single or limited sources. Single-source and limited source manufacturing arrangements are of a nature that ordinarily accompanies the type of business we conduct. Nevertheless, depending upon the component, there may or may not be alternative sources of substitutes. We purchase these components on a purchase order basis. If we overestimate our component and finished goods requirements, we could have excess inventory, which would increase our costs. If we underestimate our requirements, we may not have an adequate supply, which could interrupt manufacturing of our products and result in delays in shipments and revenues. Additionally, if any of our contract manufacturers underestimates our requirements, they may not have an adequate supply, which could interrupt manufacturing of our products and result in delays in shipments. If any of our sole or limited source suppliers experiences capacity constraints, work stoppages or other reductions or disruptions in output, they may not be able to meet, or may choose not to meet, our delivery schedules. Moreover, we have agreed to compensate our contract manufacturers in the event of termination or cancellation of orders, discontinuance of product or excess material.

We currently do not have long-term supply contracts with our component suppliers and they are not required to supply us with products for any specified periods, in any specified quantities or at any set price, except as may be specified in a particular purchase order. In the event of a disruption or delay in supply, or inability to obtain products, we may not be able to develop an alternate source in a timely manner or at favorable prices, or at all. While we regularly monitor our inventory of supplies, a failure to find acceptable alternative sources could hurt our ability to deliver high-quality products to our customers and negatively affect our operating margins.

Reliance on our suppliers exposes us to potential supplier production difficulties, quality variations and unforeseen price increases. Our customers rely upon our ability to meet committed delivery dates, and any disruption in the supply of key components would seriously adversely affect our ability to meet these dates and could result in loss of customers, harm to our ability to attract new customers, or legal action by our customers. Defense-expedite rated orders from the U.S. federal government, which by law receive priority, can also interrupt scheduled shipments to our other customers. Additionally, any unforeseen price increases could reduce our profitability or force us to increase our prices, which could result in a loss of customers or harm our ability to attract new customers and could have a material adverse effect on our consolidated financial statements.

Our customer contracts also generally allow customers to reschedule delivery dates or cancel orders within certain time frames before shipment without penalty and outside those times frames with a penalty. Because of these and other factors, there are risks of excesses or inadequate inventory that could negatively affect our expenses, revenue and earnings.

The market for some of our products depends on the availability and demand for other vendors' products.

Some of our products, particularly those addressing the Unified Communications market, are designed to function with other vendors' products. In these cases, demand for our products is dependent upon the availability, demand for, and sales of the other vendors' products, as well as the degree to which our products successfully interoperate with the other vendors' products and add value to the solution being provided to the customer. If the other vendors change the design of their products, delay the issuance of new releases, fail to adequately market their products, or are otherwise unsuccessful in building a market for their products, the demand for our products will be adversely affected.

If we fail to hire and retain needed personnel, the implementation of our business plan could slow or our future growth could be jeopardized.

Our business depends upon highly skilled technical, managerial, engineering, sales, marketing and customer support personnel. Competition for these personnel is intense, especially during times of economic recovery or growth. Any failure to hire, assimilate in a timely manner and retain needed qualified personnel, particularly engineering and sales personnel, could impair our growth and make it difficult to meet key objectives, such as timely and effective product introductions.

Our future success depends upon the continued services of our executive officers who have critical industry experience and relationships that we rely on to implement our business plan. With the exception of certain key employees based in the European Union, none of our officers or key employees is bound by an employment agreement for any specific term. The loss of the services of any of our officers or key employees could delay the development and introduction of, and negatively impact our ability to sell, our products and achieve our business objectives.

The Company's Executive Vice President of Strategy and Go-to-Market stepped down from his position effective July 29, 2014. We had two executive departures in 2013: the departure of the Company's former Senior Vice President, Global Services and Systems Management effective August 15, 2013 and the resignation of the Company's Senior Vice President and Chief Financial Officer, effective November 1, 2013. We had two executive departures in 2012: the departures of our Senior Vice President of Engineering and Chief Technology Officer in August 2012 and our Vice President of Human Resources in September 2012. We had three executive departures in 2011: the departure of our Chief Financial Officer and our Vice President of Product Operations, both in August 2011, and the departure of our Vice President of Engineering and Chief Architect in April 2011. While we have since hired replacements and promoted certain individuals, there is always a risk of uncertainty and instability relating to our ability to find highly qualified successors for certain executive positions and to transition the duties and responsibilities of any departing key executive in an orderly manner.

If we are not able to obtain necessary licenses or on-going maintenance and support of third-party technology at acceptable prices, on acceptable terms, or at all, it could harm our operating results or business.

We have incorporated third-party licensed technology, including open source software, into our current products. From time to time, we may be required to license additional technology from third parties to develop new products or product enhancements. Third-party licenses and on-going maintenance and support may not be available or continue to be available to us on commercially reasonable terms or may be available to us but only at significantly escalated pricing. Additionally, we may not be able to replace the functionality provided by third-party software currently offered with our products if that software becomes obsolete, defective or incompatible with future versions of our products or is not adequately maintained or updated. The inability to maintain or relicense any third-party licenses required in our current products or to obtain any new third-party licenses to develop new products and product enhancements could require us to obtain substitute technology of lower quality or performance standards or at greater cost, and delay or prevent us from making these products or enhancements, any of which could seriously harm the competitiveness of our products. Any significant interruption in the availability of these third-party software products or defects in these products could harm our sales unless and until we can secure an alternative source. Although we believe there are adequate alternate sources for the technology licensed to us, such alternate sources may not provide us with the same functionality as that currently provided to us.

We test our products before they are deployed. However, because our larger scale products are sophisticated and designed to be deployed in complex environments, they may have errors or defects that we find only after full deployment, which could seriously harm our business.

Our larger scale products are sophisticated and are designed to be deployed in large and complex networks. We test our products before they are deployed. However, because of the nature of our products, they can only be fully tested when substantially deployed in very large networks with high volumes of traffic. Some of our customers may discover errors or defects in the software or hardware, or the products may not operate as expected after full deployment. As we continue to expand our distribution channel through distributors and resellers, we will need to rely on and support their service and support organizations. If we are unable to fix errors or other performance problems that may be identified after full deployment of our products, we could experience:

- loss of, or delay in, revenues or increased expense;
- loss of customers and market share;
- failure to attract new customers or achieve market acceptance for our products;
- increased service, support and warranty costs and a diversion of development resources; and/or
- costly and time-consuming legal actions by our customers.

Because our larger scale products are deployed in large, complex networks around the world, failure to establish a support infrastructure and maintain required support levels could seriously harm our business.

Our larger scale products are deployed in large and complex networks around the world. Our customers expect us to establish a support infrastructure and maintain demanding support standards to ensure that their networks maintain high levels of availability and performance. To continue to support our customers with these larger scale products, our support organization will need to provide service and support at a high level throughout the world. If we are unable to provide the expected level of support and service to our customers, we could experience:

- loss of customers and market share;
- failure to attract new customers in new markets and geographies;
- increased service, support and warranty costs and a diversion of development resources; and/or
- · network performance penalties.

A portion of our revenue is generated from sales to U.S. federal government agencies, which is a new line of business for us due to our acquisition of NET in August 2012 and our acquisition of PT in February 2014. Disruptions to, or our failure to effectively develop, manage and maintain our government customer relationships could adversely affect our ability to generate revenue from the sales of certain of our products. Further, such government sales are subject to potential delays and cutbacks, require specific testing efforts, and impose significant compliance obligations.

A portion of our total revenue from product sales comes from contracts with U.S. federal government agencies. None of our current government contracts include long-term purchase commitments. Government sales is a new line of business for us due to our acquisition of NET in August 2012 and our acquisition of PT in February 2014, and disruptions to, or our failure to effectively develop, manage and maintain our government customer relationships, could adversely affect our ability to generate revenue from the sales of our products.

Until recently, a majority of NET's government sales has involved the Promina product, for which sales have declined substantially in recent periods. While governmental agencies have purchased and are evaluating some of our new products for broader deployment, this new line of business may not develop quickly or be sufficient to offset future declines in sales of the Promina product. Spending by government customers fluctuates based on budget allocations and the timely passage of the annual federal budget. An impasse in federal government budget decisions could lead to substantial delays or reductions in federal spending. During 2011, the U.S. federal government was unable to reach agreement on budget reduction measures required by the Budget Control Act of 2011 (the "Budget Act"). The sequestration began on March 1, 2013 as a result of budget cuts enacted by the Budget Act, including automatic reductions in both defense and discretionary spending. To date, the effects of sequestration have been minimal on our government business. However, expected additional budget cuts in fiscal 2014 could have an adverse effect on spending on IT and communications products and services, which could result in lower revenue from government customers in the future. Among the factors that could impact federal government spending and which would reduce our federal government contracting and subcontracting business are a significant decline in, or reapportioning of, spending by the federal government; changes, delays or cancellations of federal government programs or requirements; the adoption of new laws or regulations that affect companies that provide services to the federal government; federal government shutdowns or other delays in the government appropriations process; changes in the political climate, including with regard to the funding of products we provide; and general economic conditions. The loss or significant curtailment of any government contract or subcontracts, whether due to our performance or due to interruptio

in governmental funding for such contracts or subcontracts, could have a material adverse effect on our business, results of operations and financial condition.

The Department of Defense ("DOD") has issued specific requirements for IP networking products for features and interoperability. In order for a vendor's product to be used to connect to the DOD network, that product must pass a series of significant tests and be certified by the Joint Interoperability Test Command ("JITC"). Certain of our products are already certified by JITC, including the SBC5000. However, if we are unable to obtain JITC certification as needed, our DOD sales, and hence our revenue and results of operations, may suffer.

A substantial portion of the revenue generated from our government customers is based on our contract with the General Services Administration ("GSA"). This contract imposes significant compliance and reporting obligations on us. The contract also establishes a fixed price under which government customers may purchase our products and provides for automatic mandatory price reductions upon certain events. In addition, the GSA can impose financial penalties for non-compliance.

Consolidation in the telecommunications industry could harm our business.

The telecommunications industry has experienced consolidation, including the acquisitions of Acme Packet, Inc. and Tekelec by Oracle Corporation in 2013, and we expect this trend to continue. Consolidation among our customers may cause delays or reductions in capital expenditure plans and/or increased competitive pricing pressures as the number of available customers declines and the relative purchasing power of customers increases in relation to suppliers. Any of these factors could adversely affect our business.

We are exposed to the credit risk of some of our customers and to credit exposures in fragile financial markets, which could result in material losses.

Due to our reliance on significant customers, we are dependent on the continued financial strength of our customers. If one or more of our significant customers experience financial difficulties, it could result in uncollectable accounts receivable and our loss of significant customers and anticipated service

Most of our sales are on an open credit basis, with typical payment terms of 30 to 60 days. We monitor individual customer payment capability in granting such open credit arrangements, seeking to limit such open credit to amounts we believe our customers can pay and maintain reserves we believe are adequate to cover exposure for doubtful accounts. However, there can be no assurance that our open credit customers will pay the amounts they owe to us or that the reserves we maintain will be adequate to cover such credit exposure. Our customers' failure to pay and/or our failure to maintain sufficient reserves could have a material adverse effect on our consolidated financial statements. Additionally, in the event that turmoil in the credit markets makes it more difficult for some customers to obtain financing, those customers' ability to pay could be adversely impacted, which in turn could have a material adverse impact on our business and consolidated financial statements.

A portion of our sales is derived through our distributors. As distributors tend to have more limited financial resources than other resellers and end-user customers, they generally represent sources of increased credit risk.

The hardware products that we purchase from our third-party vendors have life cycles, and some of those products have reached the end of their life cycles. If we are unable to correctly estimate future requirements for these products, it could harm our operating results or business.

Some of the hardware products that we purchase from our third-party vendors have reached the end of their life cycles. It may be difficult for us to maintain appropriate levels of the discontinued hardware to adequately ensure that we do not have a shortage or surplus of inventory of these products. If we do not correctly forecast the demand for such hardware, we could have excess inventory and may need to write off the costs related to such purchases. The write-off of surplus inventory could materially and adversely affect our operating results. However, if we underestimate our forecast and our customers place orders to purchase more products than are available, we may not have sufficient inventory to support their needs. If we are unable to provide our customers with enough of these products, it could make it difficult to retain certain customers, which could have a material and adverse effect on our business.

Man-made problems, such as computer viruses, hacking or terrorism, and natural disasters may disrupt our operations and harm our operating results.

Despite our implementation of network security measures, our servers are vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our computer systems. Any attack on our servers could have a material adverse

effect on our business and consolidated financial statements. Additionally, the information systems of our customers could be compromised due to computer viruses, break-ins and hacking, which could lead to unauthorized tampering with our products and may result in, among other things, the disruption of our customers' business, errors or defects occurring in the software due to such unauthorized tampering, and our products not operating as expected after such unauthorized tampering. Such consequences could affect our reputation and have a material adverse effect on our business and consolidated financial statements. Efforts to limit the ability of malicious third parties to disrupt the operations of the Internet or undermine our own security efforts may be met with resistance. In addition, the continued threat of terrorism and heightened security and military action in response to this threat, or any future acts of terrorism, may cause further disruptions to the economies of the United States and other countries and create further uncertainties or otherwise materially harm our business and consolidated financial statements. Likewise, events such as work stoppages or widespread blackouts could have similar negative impacts. Such disruptions or uncertainties could result in delays or cancellations of customer orders or the manufacture or shipment of our products and have a material adverse effect on our business and consolidated financial statements.

Natural catastrophic events, such as earthquakes, fire, floods, or tornadoes, may also affect our or our customers' operations and could have a material adverse effect on our business. Moreover, one of our offices is located in the Silicon Valley area of Northern California, a region known for seismic activity. These facilities are located near the San Francisco Bay where the water table is quite close to the surface and where tenants in nearby facilities have experienced water intrusion problems. A significant natural disaster, such as an earthquake or flood, could have a material adverse effect on our business in this location.

A breach of the security of our information systems or those of our third-party providers could adversely affect our operating results.

We rely upon the security of our information systems and, in certain circumstances, those of our third-party providers, such as vendors, consultants and contract manufacturers, to protect our proprietary information and information of our customers. Despite our security procedures and those of our third-party providers, our information systems and those of our third-party service providers may be vulnerable to threats such as computer hacking, cyber-terrorism or other unauthorized attempts by third parties to access, modify or delete our or our customers' proprietary information. Information technology system failures, including a breach of our or our third-party providers' data security measures, or the theft or loss of laptops, other mobile devices or electronic records used to back up our systems or our third-party providers' systems, could result in an unintentional disclosure of customer, employee, or our information or otherwise disrupt our ability to function in the normal course of business by potentially causing, among other things, delays in the fulfillment or cancellation of customer orders or disruptions in the manufacture or shipment of products or delivery of services, any of which could have a material adverse effect on our operating results. These types of security breaches could also create exposure to lawsuits, regulatory investigations and/or increased legal liability. Such consequences could be exacerbated if we or our third-party providers are unable to adequately recover critical systems following a systems failure.

Failure or circumvention of our controls and procedures could impair our ability to report accurate financial results and could seriously harm our business

Even an effective internal control system, no matter how well designed, has inherent limitations - including the possibility of the circumvention or overriding of controls - and therefore, can provide only reasonable assurance with respect to financial statement preparation. The failure or circumvention of our controls, policies and procedures could impair our ability to report accurate financial results and could have a material adverse effect on our business and consolidated financial statements.

Any changes to existing accounting pronouncements or taxation rules or practices may cause adverse fluctuations in our reported results of operations or affect how we conduct our business.

A change in accounting pronouncements or taxation rules or practices can have a significant effect on our reported results and may affect our reporting of transactions completed before the change is effective. New accounting pronouncements, taxation rules and varying interpretations of accounting pronouncements or taxation rules have occurred in the past and may occur in the future. The change to existing rules, future changes, if any, or the need for us to modify a current tax position may adversely affect our reported financial results or the way we conduct our business. For example, a new revenue recognition standard was issued in the first half of 2014 which will be effective for companies in 2017, and could have a material impact on our consolidated financial statements.

Changes in our business strategy related to product and maintenance offerings and pricing could affect revenue recognition.

Our business strategy and competition within the industry could exert pricing pressure on our maintenance offerings. Changes in our product or maintenance offerings or packages and related pricing could affect the amount of revenue recognized in a reporting period.

If our goodwill or intangible assets become impaired, we may be required to record a significant charge to earnings.

Under generally accepted accounting principles, we review our intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Our intangible assets increased by approximately \$17 million in 2012 as a result of our acquisition of NET. Goodwill, which increased by approximately \$27 million as a result of our acquisition of NET, is tested for impairment at least annually. Additionally, our goodwill increased by approximately \$7 million as a result of the recently completed acquisition of PT, net of the reduction of goodwill related to the sale of the MPS business. Factors that may be considered a change in circumstances indicating that the carrying value of our goodwill or intangible assets may not be recoverable include significant underperformance relative to plan or long-term projections, strategic changes in business strategy, significant negative industry or economic trends, significant change in circumstances relative to a large customer, significant decline in our stock price for a sustained period and decline in our market capitalization to below net book value.

Failure by our strategic partners or by us in integrating products provided by our strategic partners could harm our business.

Our solutions include the integration of products supplied by strategic partners, who offer complementary products and services. We rely on these strategic partners in the timely and successful deployment of our solutions to our customers. If the products provided by these partners have defects or do not operate as expected, if the services provided by these partners are not completed in a timely manner, or if we do not effectively integrate and support products supplied by these strategic partners, then we may have difficulty with the deployment of our solutions that may result in:

- · loss of, or delay in, revenues;
- increased service, support and warranty costs and a diversion of development resources; and
- network performance penalties.

In addition to cooperating with our strategic partners on specific customer projects, we also may compete in some areas with these same partners. If these strategic partners fail to perform or choose not to cooperate with us on certain projects, in addition to the effects described above, we could experience:

- · loss of customers and market share; and
- failure to attract new customers or achieve market acceptance for our products.

Our use and reliance upon research and development resources in India may expose us to unanticipated costs and/or liabilities.

We have a significant research and development center in Bangalore, India and have increased headcount and development activity at this facility. The employees at this facility consist principally of research and development personnel. There is no assurance that our reliance upon development resources in India will enable us to achieve meaningful cost reductions or greater resource efficiency. Further, our development efforts and other operations in India involve significant risks, including:

- difficulty hiring and retaining appropriate engineering and management resources due to intense competition for such resources and resulting wage inflation:
- knowledge transfer related to our technology and resulting exposure to misappropriation of intellectual property or information that is proprietary to
 us, our customers and other third parties;
- · heightened exposure to changes in economic, security and political conditions in India; and
- fluctuations in currency exchange rates and tax compliance in India.

Difficulties resulting from the factors noted above and other risks related to our operations in India could increase our expenses, impair our development efforts, harm our competitive position and damage our reputation.

Failure to comply with the Foreign Corrupt Practices Act or the UK Bribery Act could subject us to significant civil or criminal penalties.

We earn a significant portion of our total revenues from international sales generated through our foreign direct and indirect operations. As a result, we are subject to the Foreign Corrupt Practices Act of 1977, as amended (the "FCPA"), and the UK Bribery Act of 2010 (the "UKBA"), which are laws that prohibit bribery in the conduct of business. The FCPA generally prohibits U.S. companies and their intermediaries from making corrupt payments to foreign officials for the purpose of obtaining or keeping business or otherwise obtaining favorable treatment, and requires companies to maintain adequate record-keeping and internal accounting practices to accurately reflect the transactions of the company. The FCPA applies to companies, individual directors, officers, employees and agents. The UKBA is much broader and prohibits all bribery, in both the public and private sectors. Although the UKBA does not contain a separate financial records provision, such a requirement is captured under other UK legislation. Under the FCPA and the UKBA, U.S. companies, their subsidiaries, employees, senior officers and/or directors may be held liable for actions taken by strategic or local partners or representatives. In addition, the U.S. government or the UK government, as applicable, may seek to hold us liable for successor liability violations committed by companies in which we acquire. If we or our intermediaries fail to comply with the requirements of the FCPA and the UKBA, governmental authorities in the United States and the United Kingdom, as applicable, could seek to impose civil and/or criminal penalties, which could have a material adverse effect on our reputation and consolidated financial statements.

Compliance with new regulations regarding the use of conflict minerals may disrupt our operations and harm our operating results.

In August 2012, under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, the Securities and Exchange Commission adopted new requirements for companies that use certain minerals and derivative metals (referred to as "conflict minerals" regardless of their actual country of origin) in their products. These metals, which include tantalum, tin, gold and tungsten, are central to the technology industry and are present in our products as component parts. As a result, we are required to investigate and disclose whether or not the conflict minerals that are used in our products originated from the Democratic Republic of the Congo or adjoining countries. There will be costs associated with these investigation and disclosure requirements, in addition to the potential costs of changes to products, processes or sources of supply as a consequence of such activities. In addition, the implementation of these rules could adversely affect the sourcing, supply and pricing of materials used in our products. Also, we may face reputational challenges if we are unable to sufficiently verify the origins for all conflict minerals used in our products through the procedures we may implement or if we are unable to replace any conflict minerals used in our products that are sourced from the Democratic Republic of the Congo or adjoining countries, as there may not be any acceptable alternative sources of the conflict minerals in question or alternative materials that have the properties we need for our products. We may also encounter challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free. If we are not able to meet customer requirements, customers may choose to disqualify us as a supplier and we may have to write off inventory in the event that it cannot be sold. These changes could also have an adverse impact in our ability to manufacture and market our products.

We are subject to governmental export and import controls that could subject us to liability, require a license from the U.S. government or impair our ability to compete in international markets.

Our products are subject to U.S. export controls and may be exported outside the United States only with the required level of export license or through an export license exception because we incorporate encryption technology into our products. Under these laws and regulations, we are responsible for obtaining all necessary licenses or other approvals, if required, for exports of hardware, software and technology, as well as the provision of service. Obtaining export licenses can be difficult and time-consuming, and in some cases a license may not be available on a timely basis or at all.

In addition, various countries regulate the import of certain encryption technology and have enacted laws that could limit our ability to distribute our products or our customers' ability to implement our products in those countries. Changes in our products or changes in export and import regulations may create delays in the introduction of our products in international markets, prevent our customers with international operations from deploying our products throughout their global systems or, in some cases, prevent the export or import of our products to certain countries altogether. Any change in export or import regulations or related legislation, shift in approach to the enforcement or scope of existing regulations or change in the countries, persons or technologies targeted by such regulations, could result in decreased use of our products by, or in our decreased ability to export or sell our products to, existing or potential customers with international operations. Any decreased use of our products or limitation on our ability to export or sell our products would likely have a material adverse effect on our business and consolidated financial statements.

Regulation of the telecommunications industry could harm our operating results and future prospects.

The telecommunications industry is highly regulated and our business and financial condition could be adversely affected by changes in the regulations relating to the telecommunications industry. Currently, there are few laws or regulations that apply

directly to access to or delivery of voice services on IP networks. We could be adversely affected by regulation of IP networks and commerce in any country where we operate, including the United States. Such regulations could include matters such as voice over the Internet or using Internet protocol, encryption technology, and access charges for service providers. The adoption of such regulations could decrease demand for our products, and at the same time increase the cost of selling our products, which could have a material adverse effect on our business and consolidated financial statements.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

The following table provides information with respect to the shares of common stock repurchased by us for the periods indicated:

<u>Period</u>	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Valu Yet	approximate Dollar ue of Shares that May be Purchased Under Plans or Programs (3)
March 29, 2014 to April 25, 2014	7,703	\$ 3.23	_	\$	40,602,829
April 26, 2014 to May 23, 2014	291,082	\$ 2.93	291,082	\$	39,751,137
May 24, 2014 to June 27, 2014	2,004,749	\$ 3.63	2,000,000	\$	32,491,137
Total	2,303,534	\$ 3.54	2,291,082	\$	32,491,137

- (1) Upon vesting of restricted stock awards, our employees are permitted to return to us a portion of the newly vested shares to satisfy the tax withholding obligations that arise in connection with such vesting. During the second quarter of fiscal 2014, 12,452 shares of restricted stock were returned to us by employees to satisfy tax withholding obligations arising in connection with vesting of restricted stock, which shares are included in this column.
- (2) Consists of shares repurchased pursuant to a stock buyback program announced on July 29, 2013 (the "2013 Buyback Program"). Under the 2013 Buyback Program, our Board of Directors has authorized the repurchase of up to \$100 million of our common stock from time to time on the open market or in privately negotiated transactions. The timing and amount of any shares repurchased will be determined by our management based on its evaluation of market conditions and other factors. We may elect to implement a 10b5-1 repurchase program, which would permit shares to be repurchased when we might otherwise be precluded from doing so under insider trading laws. The 2013 Buyback Program may be suspended or discontinued at any time. The 2013 Buyback Program is being funded using our working capital.
- (3) Consists of amounts that remain available for repurchases under the 2013 Buyback Program.

Item 6. Exhibits

Exhibit No.	Description
10.1	Credit Agreement, dated as of June 27, 2014, by and among Sonus Networks, Inc., as Borrower, Bank of America, N.A., as Administrative Agent, Swing Line Lender and L/C Issuer, and the other lenders from to time party thereto (incorporated by reference to Exhibit 10.1 to the registrant's Current Report on Form 8-K, filed June 30, 2014 with the SEC).
10.2	Security and Pledge Agreement, dated as of June 27, 2014, by and among Sonus Networks, Inc., Sonus International, Inc., Sonus Federal, Inc., Network Equipment Technologies, Inc., Performance Technologies, Incorporated and Bank of America, N.A., as Administrative Agent (incorporated by reference to Exhibit 10.2 to the registrant's Current Report on Form 8-K, filed June 30, 2014 with the SEC).
10.3	Master Continuing Guaranty, dated as of June 27, 2014, by and among Sonus Federal, Inc., Network Equipment Technologies, Inc., Performance Technologies, Incorporated and Sonus International, Inc. (incorporated by reference to Exhibit 10.3 to the registrant's Current Report on Form 8-K, filed June 30, 2014 with the SEC).

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

- I, Raymond P. Dolan, certify that:
 - 1. I have reviewed this Quarterly Report on Form 10-Q of Sonus Networks, Inc.;
 - 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 - 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 - 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(f)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
 - 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Annual Report on Form 10-K of Sonus Networks, Inc. (the "Company") for the period ended June 27, 2014 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), the undersigned, Raymond P. Dolan, President and Chief Executive Officer of the Company, hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to his knowledge:

- (1) the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Annual Report on Form 10-K of Sonus Networks, Inc. (the "Company") for the period ended June 27, 2014 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), the undersigned, Mark T. Greenquist, Chief Financial Officer of the Company, hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to his knowledge:

- (1) the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
